

An all-round solution to empower employees.

The way we work is changing dramatically. Employees enjoy more flexibility in their work days and are increasingly mobile, allowing virtually seamless productivity – from desk, to home, to meeting room, to travels. It's almost as if work has become detached from time and space. However, the modern anywhere workplace means all new challenges for organisations. IT workplaces are increasingly complex and difficult to deploy.

From planning, financing and licensing, to rollouts, user training and support – managing an IT workplace ties up a lot of resources in your company. And that's far from the end of it. Critical security, mobility, collaboration, infrastructure and software deployments require thorough consideration. The need for smooth, uninterrupted business processes calls for an effective workplace solution that tackles all these challenges head-on. Bechtle offer custom-tailored half-day or full-day workshops to explore the Modern Workplace against the backdrop of your individual needs.

The workshop kicks off in the morning with a look at the big picture that is the Modern Workplace. We will show you the products and solutions that are available and match your existing IT infrastructure, along with valuable tips and recommendations to help you plan a successful strategy. Would you like to delve deeper into a particular Modern Workplace topic or even plan a proof of concept?
