Zero Trust – The Citrix Way

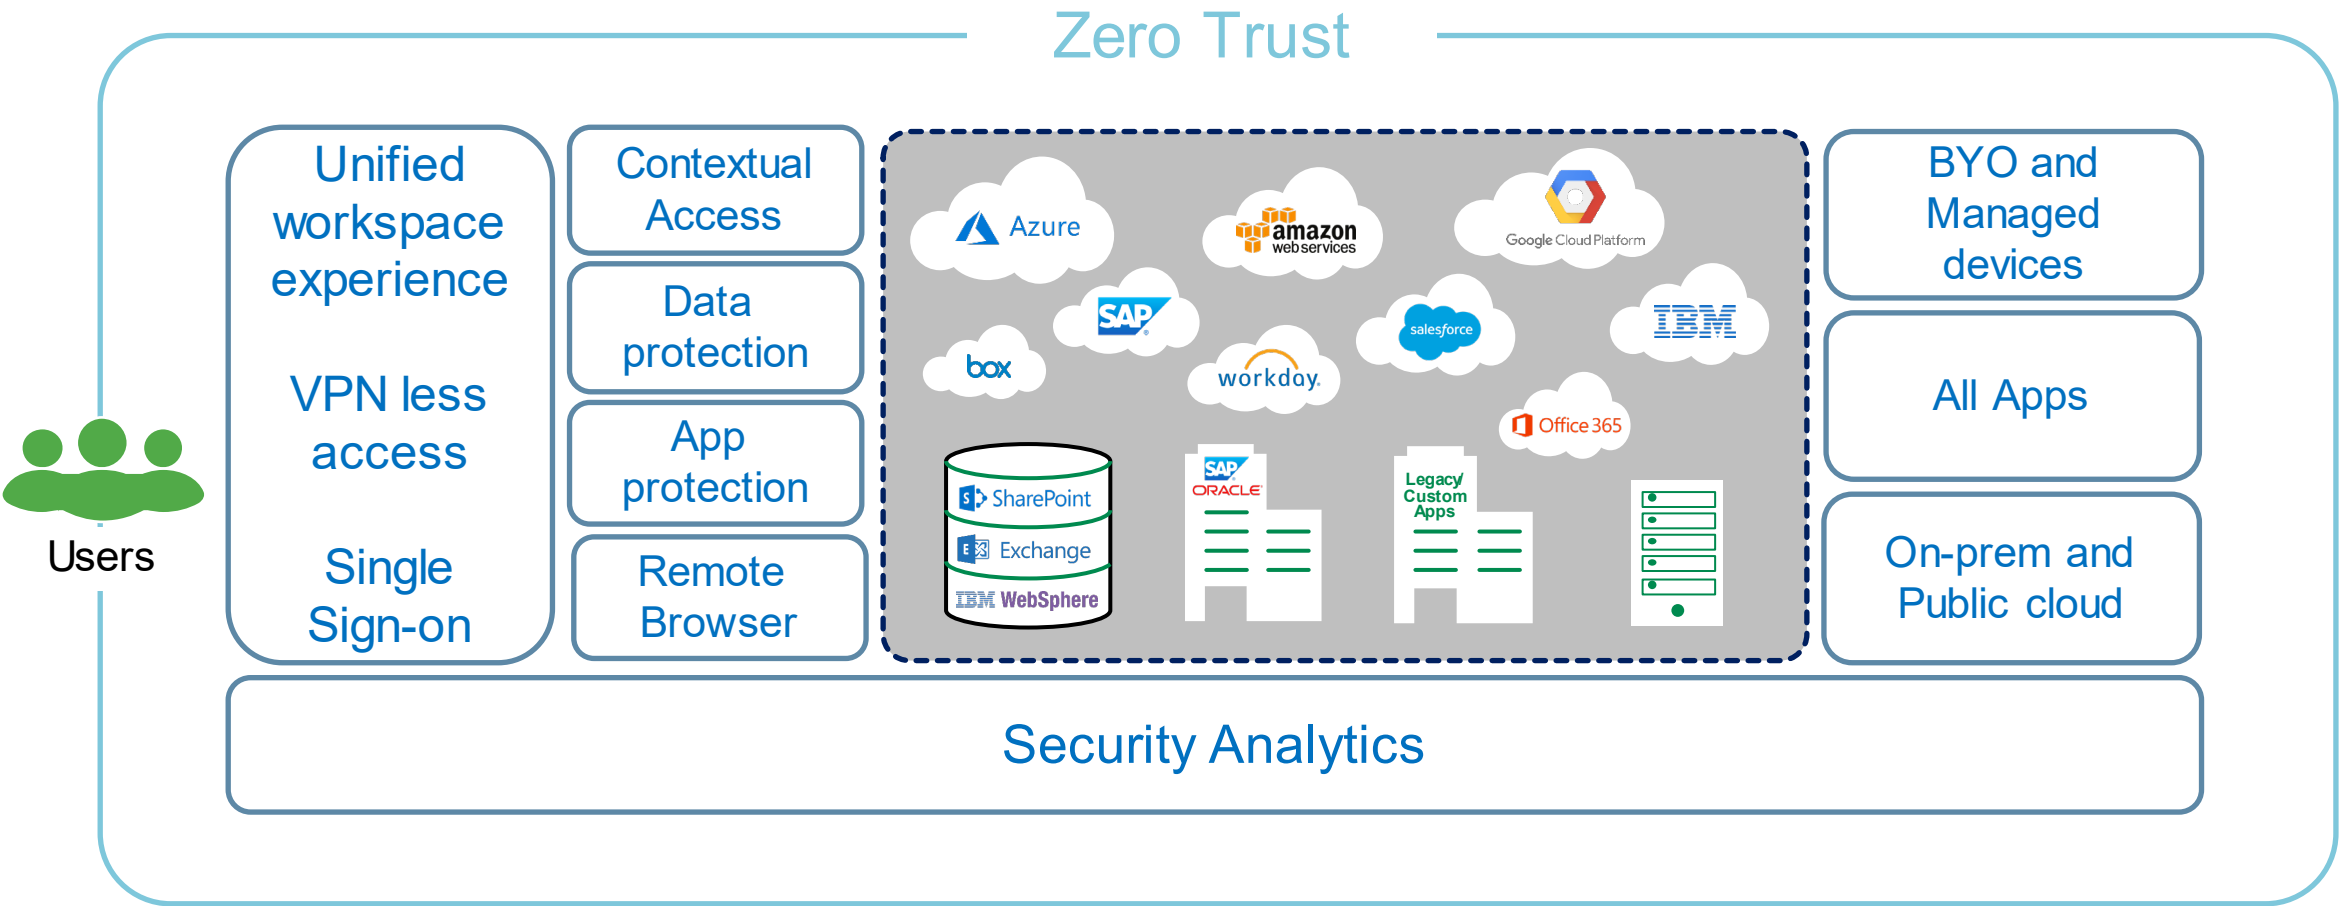

Never Trusting, Always Verifying

Citrix Definition

- Collective approach – no point products
- Single dashboard, consistent user profile across all apps, network and data
- Centrally managed, continuous evaluation and enforcement across devices, networks, applications and data

You need a holistic approach for securing access

What might an automated action look like for you ?

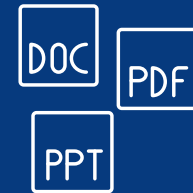

Call center agent, typically works from center or home, in PH.

Automated Actions Triggered:
none

Suddenly logs in from a new location (Europe), atypical behavior and a binary is run which is unusual.

Automated Action Triggered:
start Session Recording

Typically users copy out less than 10 MB of files, today the user has gone over 10 MB, and this is extremely unusual.

Automated Action Triggered:
Disable users' account in Citrix Content Collaboration or in Citrix Gateway
