360° swiss cube.

Looking for a dedicated platform that offers the benefits of a reliable data centre (security, multiple redundancies, ultra-modern infrastructure) and also granular services covering everything from support, operations and full sourcing? Swiss Cube is the solution that offers exactly the flexibility you need without having to worry about technical requirements!

Using 360° swiss cube as a basic infrastructure, you have a scalable solution that can be combined with other 360° managed services. We provide you with a completely dedicated IT infrastructure such as storage, hardware, server and storage network in the Green Datacenter. You rent the infrastructure you need and we take care of the operations and maintenance with hypervisor.

OUR SERVICES:

▮ High-quality, hyper-converged hardware and preconfigured infrastructure for the operation of virtual customer systems including hosts, storage networks, storage and hypervisor (VMware)

▮ Securing infrastructure operation including proactive monitoring of basic systems, such as storage network, storage and hypervisor

▮ Customer-independent management connection to Bechtle data centre

▮ Professional service desk: Mon. - Fri. 8:00 am - 6:00 pm

▮ Optional infrastructure upgrades possible

▮ Optional support of virtual customer systems from basic support to complete operations

▮ Rack space of 20 - 48 U depending on package

▮ Own devices possible depending on rack space

▮ Access to data centre possible with chaperon
