# Augmented reality

## The potential applications of Augmented Reality in the promotional market

There is a lot of talk about Augmented Reality (AR) which has been a part of our daily life for some time, but what does it mean to make the most of this opportunity within the promotional market?

The technology now plays an important role: imagine scanning a QR code on a product sheet with a tablet or smartphone, the system recognising it and then perfectly mapping it to the reality that the person is experiencing at that precise moment. Or during a

presentation, when putting together a brief, to gather concrete ideas about a project.

We have always been naturally oriented towards innovation, towards the future, and we were ready to include AR in our product launches.

Augmented Reality has already been integrated in several other areas, predominantly in entertainment, and now in the world of corporate gadgets: a new tool to bridge the gap between

the company and its customers in a market where being "global" is not only a mere aspect, but an essential requirement.

AR technology has now become a fully fledged form of visual content management, allowing us to add a new dimension of information to our products by enabling customers to interact with them on a deeper level.

This has begun a revolution in the Customer Experience, with our products now able to be seen in real physical contexts to aid customers in

their selection processes, guided by the highly informative approach that sets us apart.

One thing is for certain: the status quo is ready to be turned on its head, and Augmented Reality will enable us to develop an ever wider array of applications with our imagination and creativity.

PopSockets®: original brand quality from your trusted supplier

# The original PopSockets® as a corporate gift!

## PopGrip

PopGrip Swappable is the version with interchangeable disc of the famous PopSockets®, the patented smartphone grip/stand that can be customised with a company logo for promotional use. The fact that you can swap the disc (PopTop) makes this accessory incredibly versatile: you can still use

the PopGrip (which has a universal connection) and swap the PopTop to change colours, images or materials. It is also the ideal solution for smartphones compatible with wireless charging: simply remove the PopTop and place the mobile on the charger.

<b>PRINT</b>	Matt CMYK, Glossy CMYK

## PopGrip Plant

PopGrip Plant is the green variant of the famous PopSockets®, the patented smartphone holder that can be customized with a company logo for promotional use. Its peculiarity is that it is made with at least 1/3 of completely recyclable materials of vegetable origin, such as corn starch, castor beans and canola

oil. Once attached on the back of the device, PopGrip becomes a practical support to keep the phone in an upright position, or a comfortable grip allowing to grab it with just one hand and write messages, watch videos or take photos. It also works as a cable reel to keep cables or earphones tidy.

# Branding: the art of being recognized and remembered

Branding is what makes your brand recognizable, credible, and memorable. It is the combination of values, style, and communication that builds an authentic connection with your audience. Every personalized product becomes an extension of your identity, capable of strengthening your brand presence and leaving a lasting impression.

## A product that really talks about you

Your logo and your products are unique and this is the best way to enhance them

## Even the budget is customized!

Different price brackets, to suit any budget

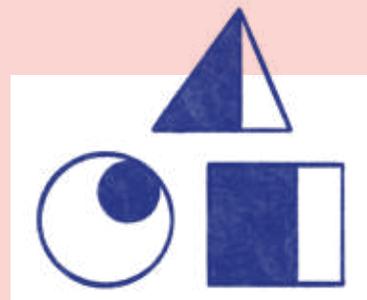

## Big projects, minimum quantities

The minimum order quantity is just 100 pieces!

## Reproduction of any shape or logo!

The highest level of detail and design in terms of shape and colors.

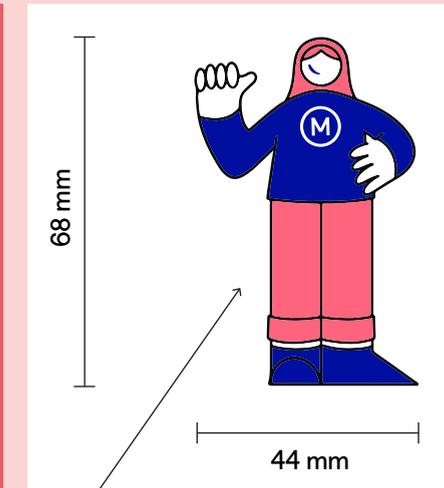

## Make up your own gift set

You can create an entire range of different products with the same customized shape

YOUR LOGO

OUR PROJECT

YOUR PRODUCT

Sooner or later, every company feels the need to strengthen its brand identity: making the corporate image more consistent, reaching new markets, or consolidating relationships with its audience.

One of the most effective ways to achieve this is through personalized products, which can visually communicate the brand's values and make them instantly recognizable. When distributed to clients and collaborators, they become tangible branding tools, conveying the company's identity in a direct and lasting way.

Our Custom Lab products are perfect for this purpose: they allow you to reproduce any three-dimensional shape and create tailor-made promotional accessories, turning every idea into an authentic expression of your brand.

Likewise, any other product in this catalog can become a powerful branding tool. Browse the pages and get inspired to bring your brand identity to life.

# Jacquard? Jacquard!

Every embroidery is unique. Choose the perfect product for your project and personalize it with the one-of-a-kind jacquard technique.

## Jacque Bag

The JACQUIE BAG is a promotional accessory designed to combine style, sustainability, and maximum customization. # What to know before choosing a Power Bank

The evolution of mobile devices has brought about the need for increasingly efficient and versatile charging solutions. Power Banks have become essential allies in keeping various technological devices powered throughout the day in a convenient and reliable manner.

New models have been introduced, such as wireless and induction Power Banks. The first ones utilize

Qi technology to enable wireless charging of compatible devices. Second ones, on the other hand, allow charging simply by placing the device on the induction surface.

To choose the best charging system that suits your needs, you can consider various factors that vary from person to person based on habits, lifestyles, and the devices in use.

The main elements to consider are:

### Needs

Assess the number of mobile devices you want to charge and how frequently you use them throughout the day. Additionally, smaller and lighter systems are useful for those who travel or are frequently on the move, as they are easy to carry.

### Capacity

Choose a Power Bank with a capacity sufficient to fully charge your device at least once is recommended. Keep in mind that a higher capacity may result in larger dimensions and increased weight.

### Compatibility

Ensure that the charging system is compatible with your devices and check if it supports devices with USB connection or specific options such as Power Delivery (PD) technology for fast charging.

## Jazz

Jazz is a recycled aluminium (RCS Certification) 4.000 mAh power bank with a slim, rectangular shape. Ideal for charging various devices, it has two ports: one Type-C both input and output and one USB-A output only. It comes with a USB-A to Type-C charging cable made of recycled TPE.

<b>CAPACITY</b>	● 4.000 mAh
<b>SIZE</b>	11,6 × 6,8 × 1,0 cm

# Reusable packaging

In recent years, there has been a consolidated trend toward the inclusion of environmental issues in the daily activities and communication of companies, and new initiatives are also being launched in this direction to facilitate the move to an environmentally friendly consumption pattern.

In this context, the use of recycled and recyclable materials is already widespread, both in the manufacturing of products and in the packaging that contains them. However, is it possible to expand the boundaries of this vision and guide one's customers in the direction of eco-friendly consumption?

This is where we got the idea of designing and developing packaging that can initially contain the product, but then offer the possibility of a different use through a change in form, making it a totally unexpected object.

Here, then, is our first small step that can make a difference in the use of materials: a fish-bone shaped cable winder can be made from the box that holds one of our water bottles. You can carry it with you at all times to keep your earbuds and electronic devices cables tidy.

Reuse and waste reduction are certainly one of the current trends, but for us they are much more than that: we recognize our responsibility as a company in reducing the environmental impact on a daily basis and we continue day after day toward the constant search for innovative and sustainable proposals.

## Globe Trotter

The Globe Trotter adaptor is cube-shaped, small and light. The prongs are all inside the shell of the adaptor and can be selected by using a pressure-scroll button. A luminous LED lights up when the adaptor is plugged in and in use. It also includes two USB ports to charge devices.

	IO
<b>SIZE</b>	6,1 x 4,5 x 5,6 cm

charging power when the cable is connected to devices. Additionally, this Type-C cable integrates an e-marker chip that enables communication between the product and the connected device, ensuring a reliable and efficient charge. This makes the cable smarter and safer.

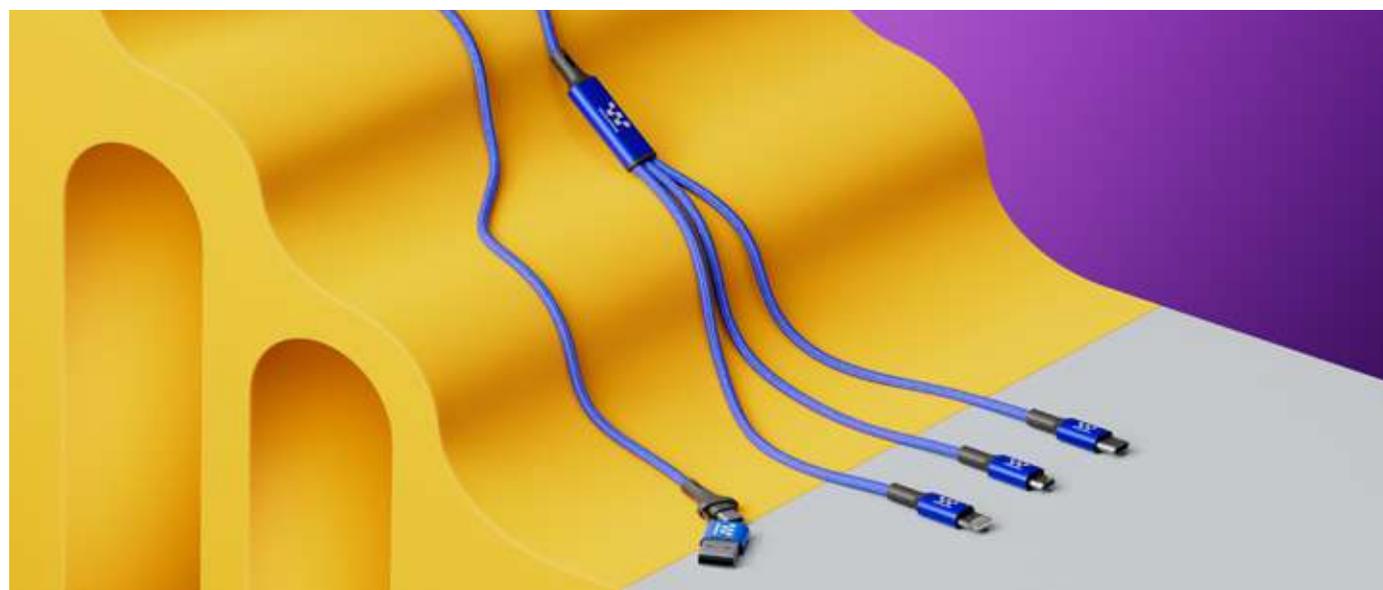

## Slinky

4-in-1 magnetic cable in braided nylon for charging and data transfer. It features 2 dual connectors: one side has USB-A and Type-C, and the other side has Lightning and Type-C. This makes it extremely versatile and usable with any device on any occasion. The unique feature of this product is its "spring"

●  
**SIZE** 100 cm  
**MATERIALS** Plastic + Metal  
**PRINT** Laser Engraving

design, which prevents the cable from twisting and creating inconvenient tangles. Customization with logos and graphics can be done on all 4 connectors of the cable through laser engraving.

## Braided

120 cm dual USB-A and Type C connector cable in input with multiple micro-USB, Lightning and Type C connectors all in output. The cables are covered with a woven nylon fibre fabric available in black, blue and silver. The nylon cord makes the cable robust and break-resistant, and while

it is extremely flexible, it has an anti-tangle effect because it does not create knots. The connectors of the three cables and the hub from which they exit are made of metal and can be customised with a company logo by laser engraving.

SIZE	● ● ● 120 cm
MATERIALS	Plastic + Metal
PRINT	Laser Engraving

## Input

Input is a hub that allows multiple devices to be connected at the same time by centralising connections from different sources and reducing cable clutter. The aluminium body with black pvc Type C connector cable has four inputs including two USB ports, one 2.0 and one 3.0, one HDMI, and one Type

C port. It is available in anthracite grey and can be customised on both sides with the laser engraving technique.

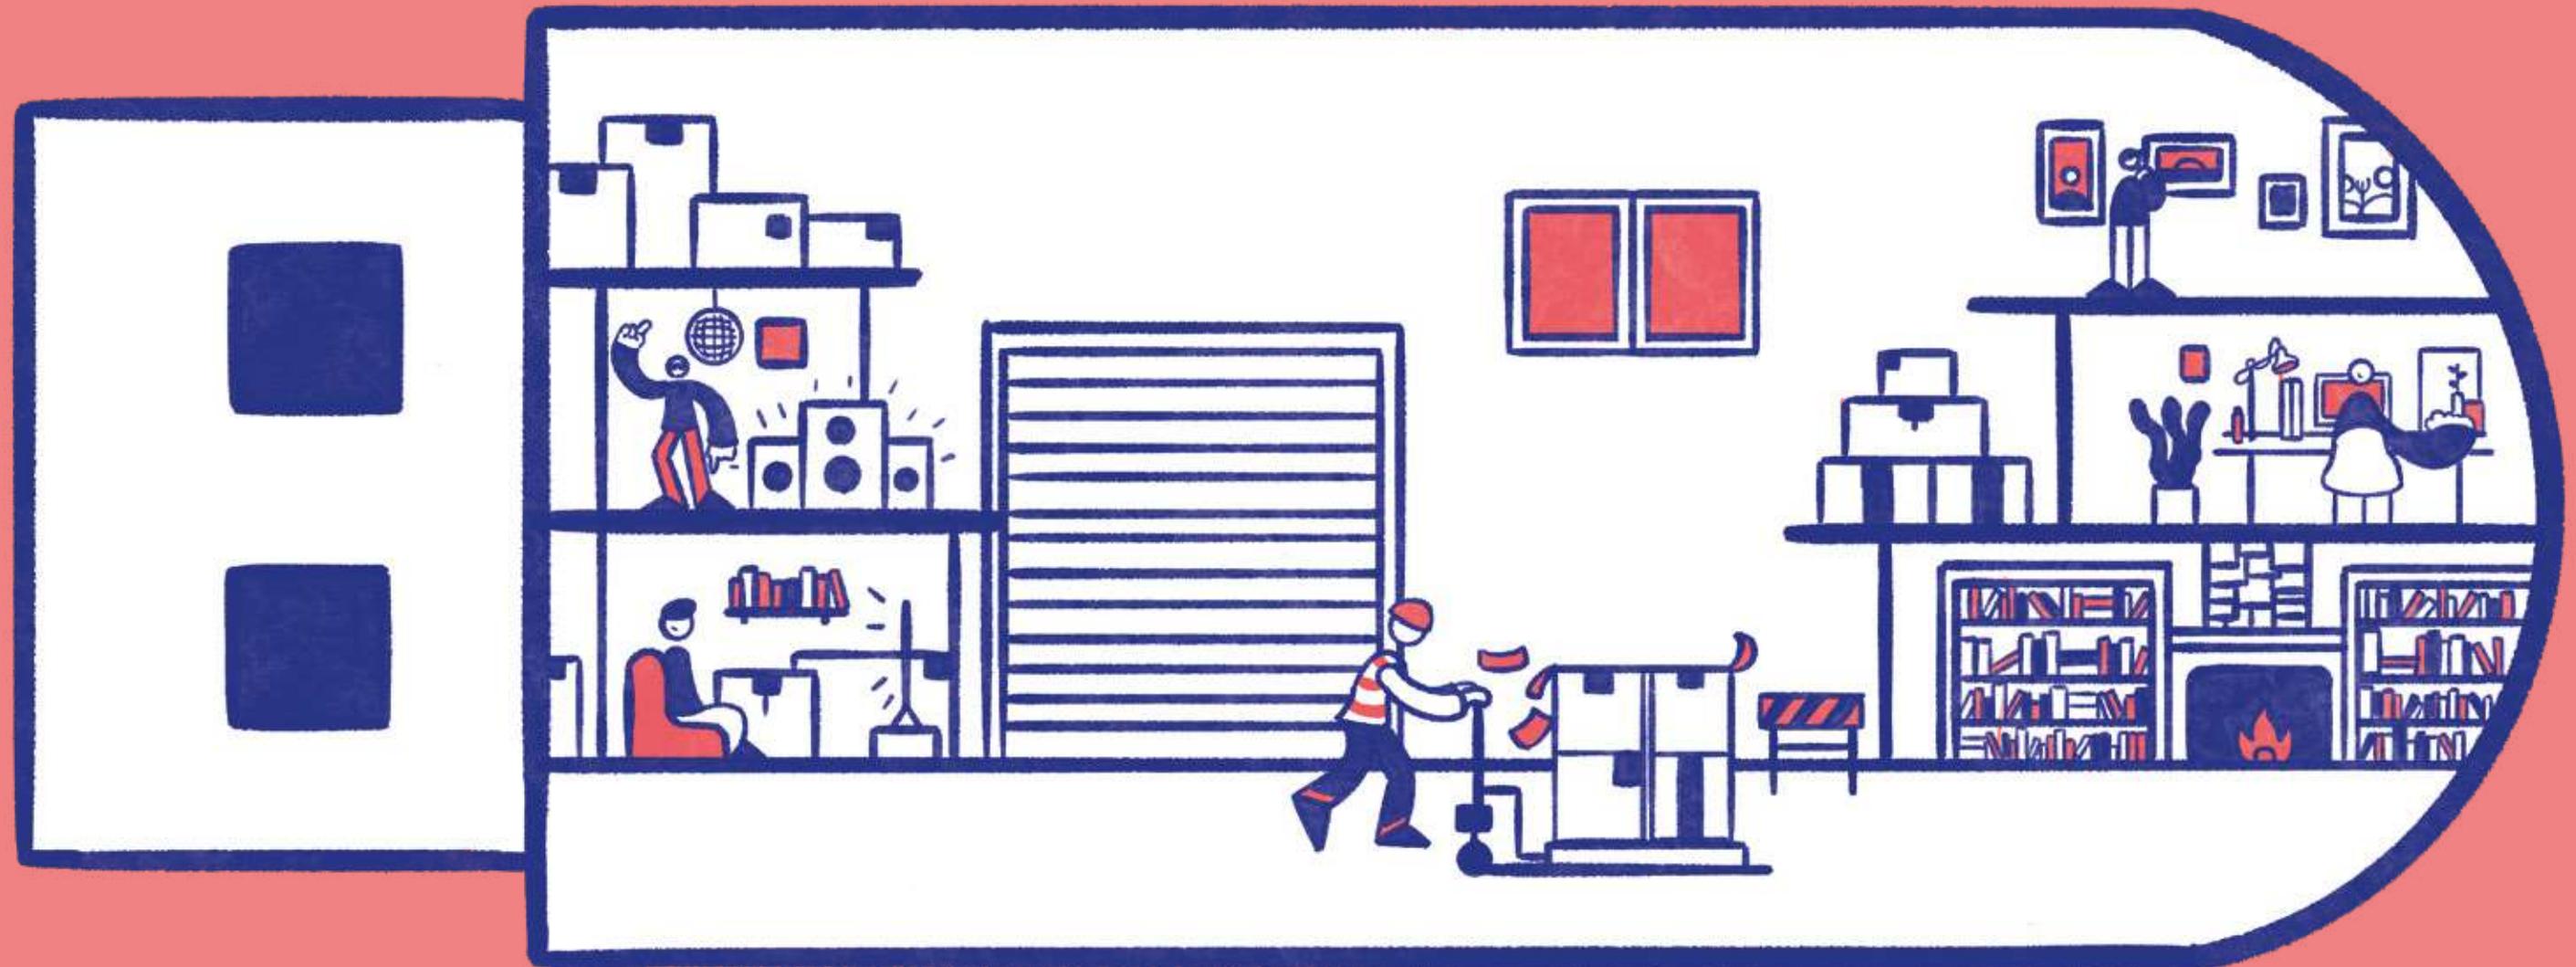

SIZE	● 8,2 × 2,9 × 1,2 cm
MATERIALS	Aluminium

# Made in Italy

## Viva

Made in Italy USB flash drive with a casing made from recycled plastic. Each of these products carries a unique and natural color, typical of this material. Every detail is designed to offer a high-quality product, customizable on both sides with digital printing. A small product that becomes a

great vehicle to communicate your brand in an original and responsible way.

<b>SIZE</b>	6,4 × 2,0 × 0,8 cm
<b>MATERIALS</b>	Recycled plastic
<b>PRINT</b>	Digital printing

## Iron Stick

A metal USB flash drive with a compact design and silver colour. The memory chip is housed inside the shell, which is shock resistant and protects it from water and dust. The product also has a notch at the end that allows laces and accessories to be placed through it.

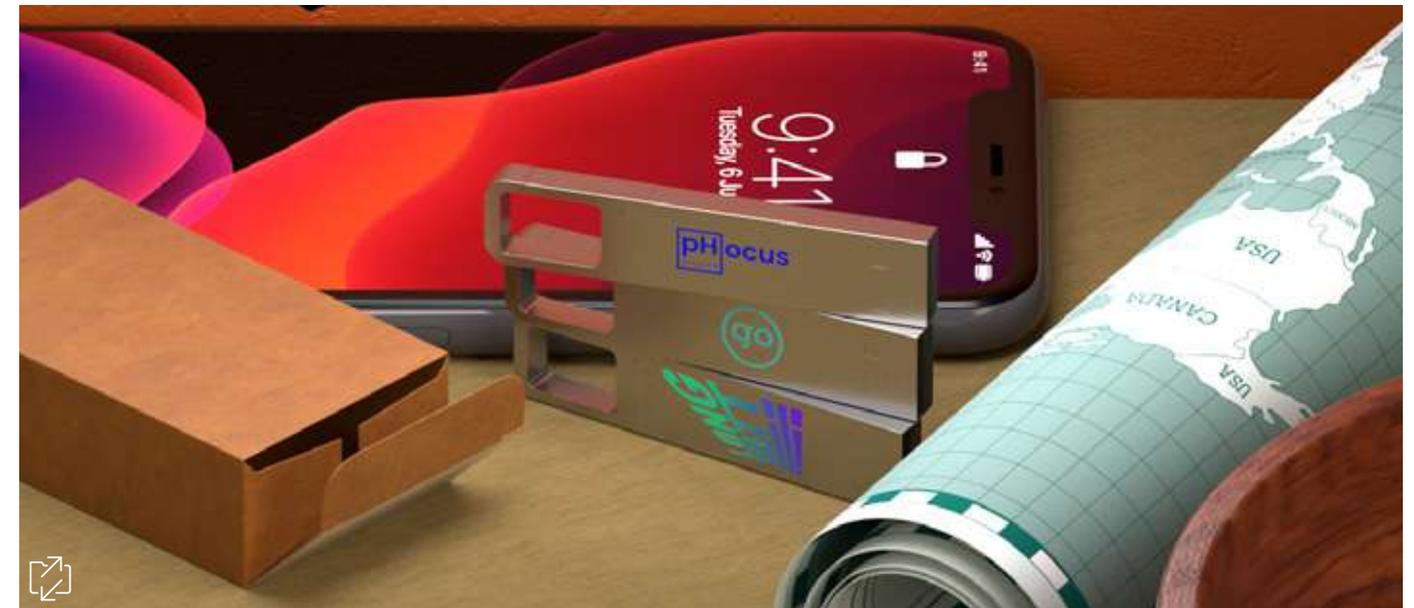

<u>SIZE</u>	● 4,3 × 1,2 × 0,4 cm
<u>MATERIALS</u>	Metal
<u>PRINT</u>	Silk-screen Printing, UV Printing, Laser Engraving

## Iron Stick 2

A metal USB flash drive with a compact design and silver colour. The memory chip is housed inside the shell, which is shock resistant and protects it from water and dust. It can be customized on 2 sides via screen printing, laser engraving and UV printing.

<u>SIZE</u>	● 5,0 × 1,2 × 0,4 cm
<u>MATERIALS</u>	Metal
<u>PRINT</u>	Silk-screen Printing, UV Printing, Laser Engraving

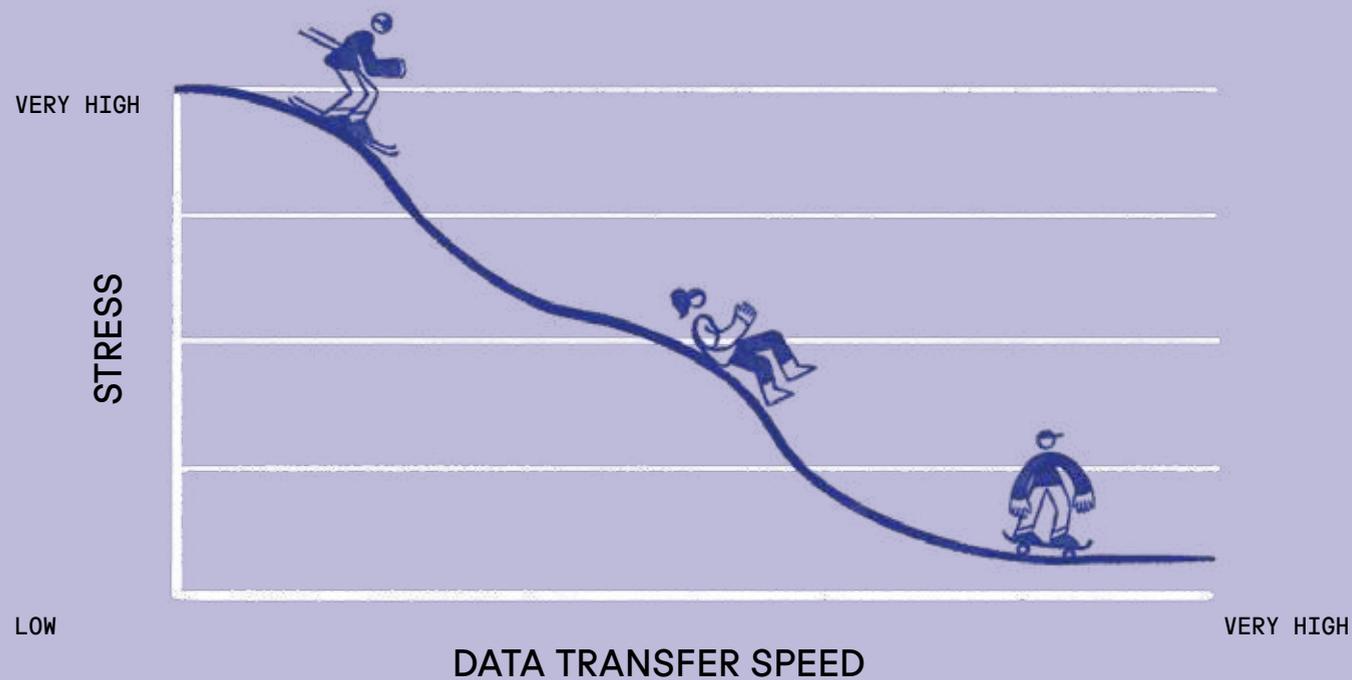

## Iron Hook

A metal USB flash drive available in the classic silver colour. The memory chip is housed inside the shell which is shock resistant and protects it from water and dust. It is customizable on 2 sides through screen printing, laser engraving and UV printing.

The compact design, combined with the carabiner hook at the end of the product, allows for easy carrying even when using laces and accessories.

<u>SIZE</u>	● 5,7 × 1,2 × 0,4 cm
<u>MATERIALS</u>	Metal
<u>PRINT</u>	Silk-screen Printing, UV Printing, Laser Engraving

# Why should I choose a USB 3.0?

Have you ever had to deal with speed-related issues when using a USB interface? A low read and write speed can really test our patience. This probably happens because you didn't know that there is a valid alternative,

and it's called USB 3.0.

USB 3.0 technology has revolutionized the external memory drive market, as it provides great advantages in terms of performance.

## What advantages?

### – Data transfer speed.

This is the main advantage: in terms of numbers, we're talking about a speed that is ten times faster than USB 2.0 technology. However, it must be noted that such speeds can only be reached if the USB port being used supports this technology.

### – Compatibility.

Cables and flash-drives that use 3.0 technology are backwards compatible, which means that they can easily be used with USB ports that have 2.0 technology.

## How to recognize?

Aesthetically, there is a way to distinguish between a 3.0 and a 2.0 port or connector. The contacts base on the inside is blue, whereas for the latter it is white.

Search in our catalogue for USB flash-drives with 3.0 technology, look for the mark and find all the models available!

USB 3.0

## Compact

Compact is a USB flash drive with a Type C connector and metal shell. Its minimal and compact design makes it practical and versatile for transferring data between various next-generation devices such as smartphones, PCs, etc.

	● ● ●
<u>SIZE</u>	3,6 × 1,9 × 0,6 cm

### Twister Rubby

Rectangular, compact USB flash-drive. It is equipped with a metal rotation cap with a customisable surface. It has a small functional ring at the end to apply straps and accessories. The Twister-Rubby model is one of the most popular models sold.

**SIZE** 5,8 x 2,0 x 1,0 cm  
**MATERIALS** Plastic + Aluminium  
**PRINT** Silk-screen Printing, Laser Engraving, Epoxy Doming, CMYK Printing

### Twister Color

Its key asset is the unlimited selection of colors: starting from a minimum order quantity of just 100 pieces it can be customized with any Pantone colors both on the rotating part and the body. Feel free to create your own creative combination of colors!

**SIZE** 5,8 x 2,0 x 1,0 cm  
**MATERIALS** Plastic + Aluminium  
**PRINT** Silk-screen Printing, Laser Engraving, Epoxy Doming, CMYK Printing

### FlashKey Square

Metal key-shaped USB flash-drive with a square end. This flash-drive has a clean design and is ultra slim as a result of the latest generation COB chip. It is equipped with a functional slot to apply straps and accessories, and is ideal to hook onto key chains.

**SIZE** 5,6 x 2,4 x 0,2 cm  
**MATERIALS** Metal  
**PRINT** Silk-screen Printing, Laser Engraving

# What is OTG technology?

USB On-The-Go (OTG) is a standardized specification for USB connections that allows a device to read data from a USB connection without requiring a PC.

Our USB flash-drives with On-The-Go technology are equipped with a standard USB connector on one side and a micro-USB connector on the other. This means you can connect your USB flash-drive directly to a smartphone or

digital camera or any other device without any wires or cables, to read and transfer your data quickly and immediately.

The USB flash-drives OTG are compatible with Android operating system.

### Bullet OTG Type-C

Aluminium flash drive with extra "on the go" connector. Bullet OTG Type-C features a rotating system with a customisable surface and a small hole for laces and accessories. The silver-coloured surface can be customised on both sides in four-colour process or laser.

**SIZE** 4,0 x 1,2 x 0,7 cm  
**MATERIALS** Metal  
**PRINT** Laser Engraving, CMYK Printing

## Tie

Metal USB flash-drive with a striking yet simple, slim-line design. The memory chip is housed within the body, and there is silicone loop at the other end to which a small keyring is attached, which is useful for threading cords and accessories.

<u>SIZE</u>	7,7 × 2,0 × 0,5 cm
<u>MATERIALS</u>	Metal
<u>PRINT</u>	Laser Engraving, Black Laser

## Barracuda

USB flash-drive with a modern and essential design. Inside the plexi section there is a LED that lights up when the key is connected to the computer, enhancing the logo on the surface or inside the plexiglass. Barracuda is in fact customizable through three-dimensional laser engraving in the plexi part.

<u>SIZE</u>	4,5 × 1,2 × 0,5 cm
<u>MATERIALS</u>	Plastic + Aluminium
<u>PRINT</u>	Laser Engraving, Internal laser Engraving

## Barracuda Color

The plexi part, available in five shades, allows for three-dimensional laser engraving, a printing technique where the logo is engraved with a permanent result, and is not subject to wear and tear, enhanced by the effect of the LED lighting. The metal surface can also be customised with a printed logo.

<u>SIZE</u>	4,5 × 1,2 × 0,5 cm
<u>MATERIALS</u>	Plastic + Aluminium
<u>PRINT</u>	Laser Engraving, Internal laser Engraving

## Lamp

Metal USB flash drive with an essential and slim design a memory chip that is housed inside the body. This USB is available in silver colour and its peculiarity is the customizable LED logo on the front in various colours such as green, white, blue and red.

<u>SIZE</u>	7,6 × 2,5 × 0,5 cm
<u>MATERIALS</u>	Metal

Urgent orders? No problem at all.

# Fast delivery

The products ready for delivery are shipped from our premises within 24/48 hours from the order confirmation. Delivery takes place in 24 or 72 hours depending on the destination

area and the type of product. Power Bank, speakers and all battery-powered products may have longer delivery times because they do not allow shipping by air.

**24h**

without customization

**48h**

with your logo printed on it

# Tailored projects to promote your uniqueness

Over 15 years of experience and a product catalog with more than 150 items. And if that's not enough, tell us about your promotional project: we will create a unique product for you, as distinctive as your company, tailor-made like a bespoke suit.

**Every company is unique,  
just like its needs.**

For this reason, a standard catalog cannot always meet every need. And this is exactly where we come in.

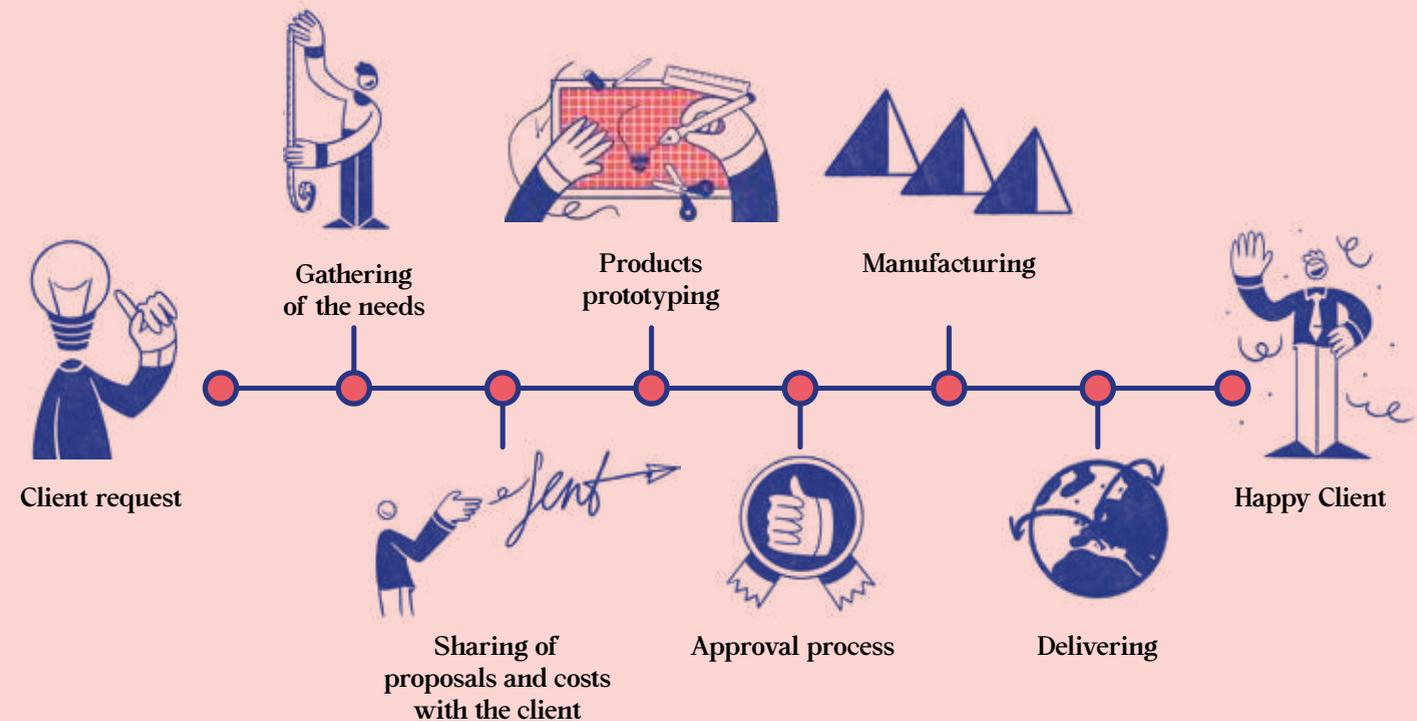

**“We specialize in creating tailor-made projects for any industry and every promotional need.”**

We design and develop personalized and off-catalog products, built according to our clients' specific requests. If you haven't found the perfect solution yet, contact us—together we will bring your project to life!

## **The production line from enquiry to delivery.**

From the initial request to the final delivery, we oversee every stage of the production process, working closely with our clients to create original products that are consistent with their brand identity.

Let's  
Make it

**WOW**
