The easiest way to start your **hybrid meeting**

Walk into the
meeting room

Plug in a Button or
connect with the App

Start the call
from your laptop

Smart meeting flows

Room availability

Walk into the meeting room, you immediately see if the room is available or booked

PresentSense

Automatically connect to the meeting room or plug in a Button

HostFlow

ClickShare automatically guides you as a host or participant

Digital signage

When you end the call, the meeting room display becomes a digital signage display

Advanced sharing

Share full screen or application window, while keeping your laptop screen private for note taking

ConferenceView

Share your presentation, keep track of remote participants' video, side by side

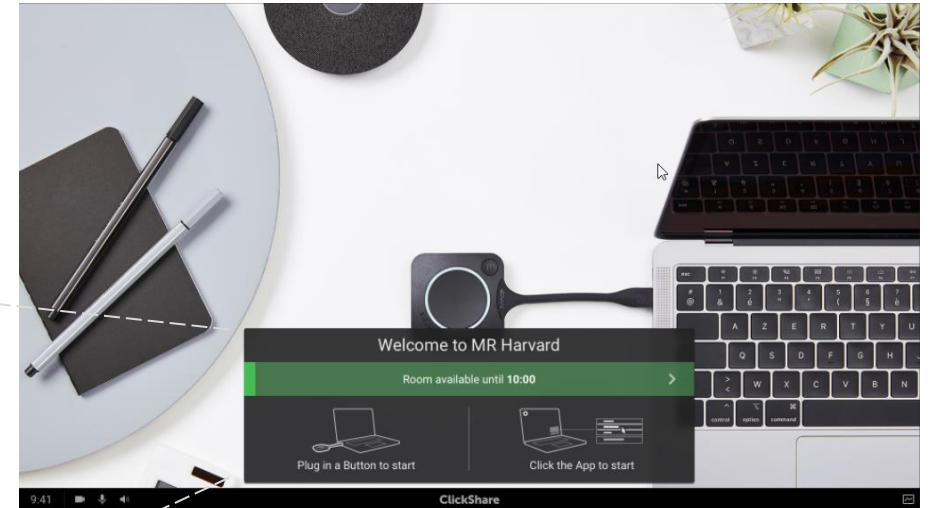

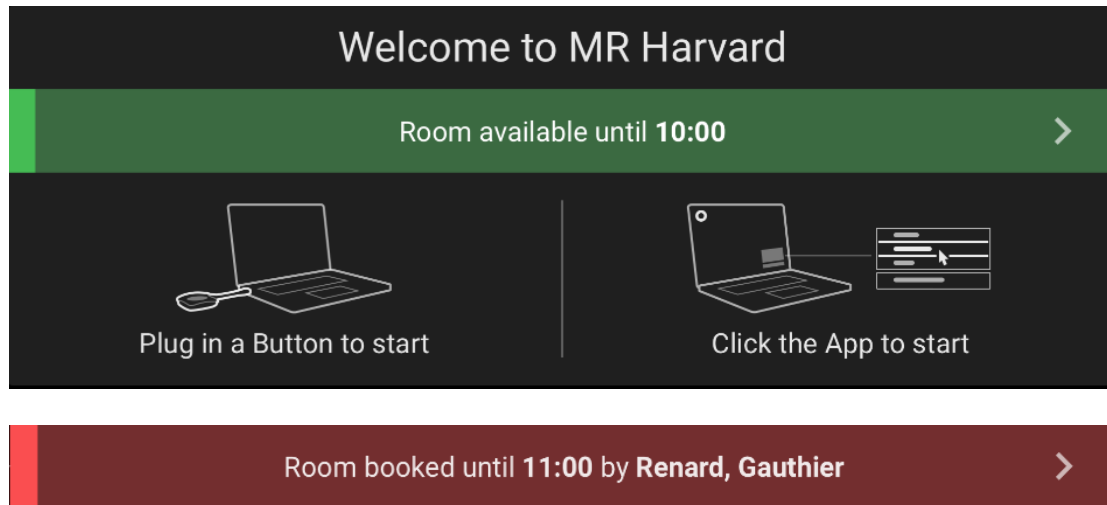

One-Click-Join

Start the meeting from your personal calendar with a single click

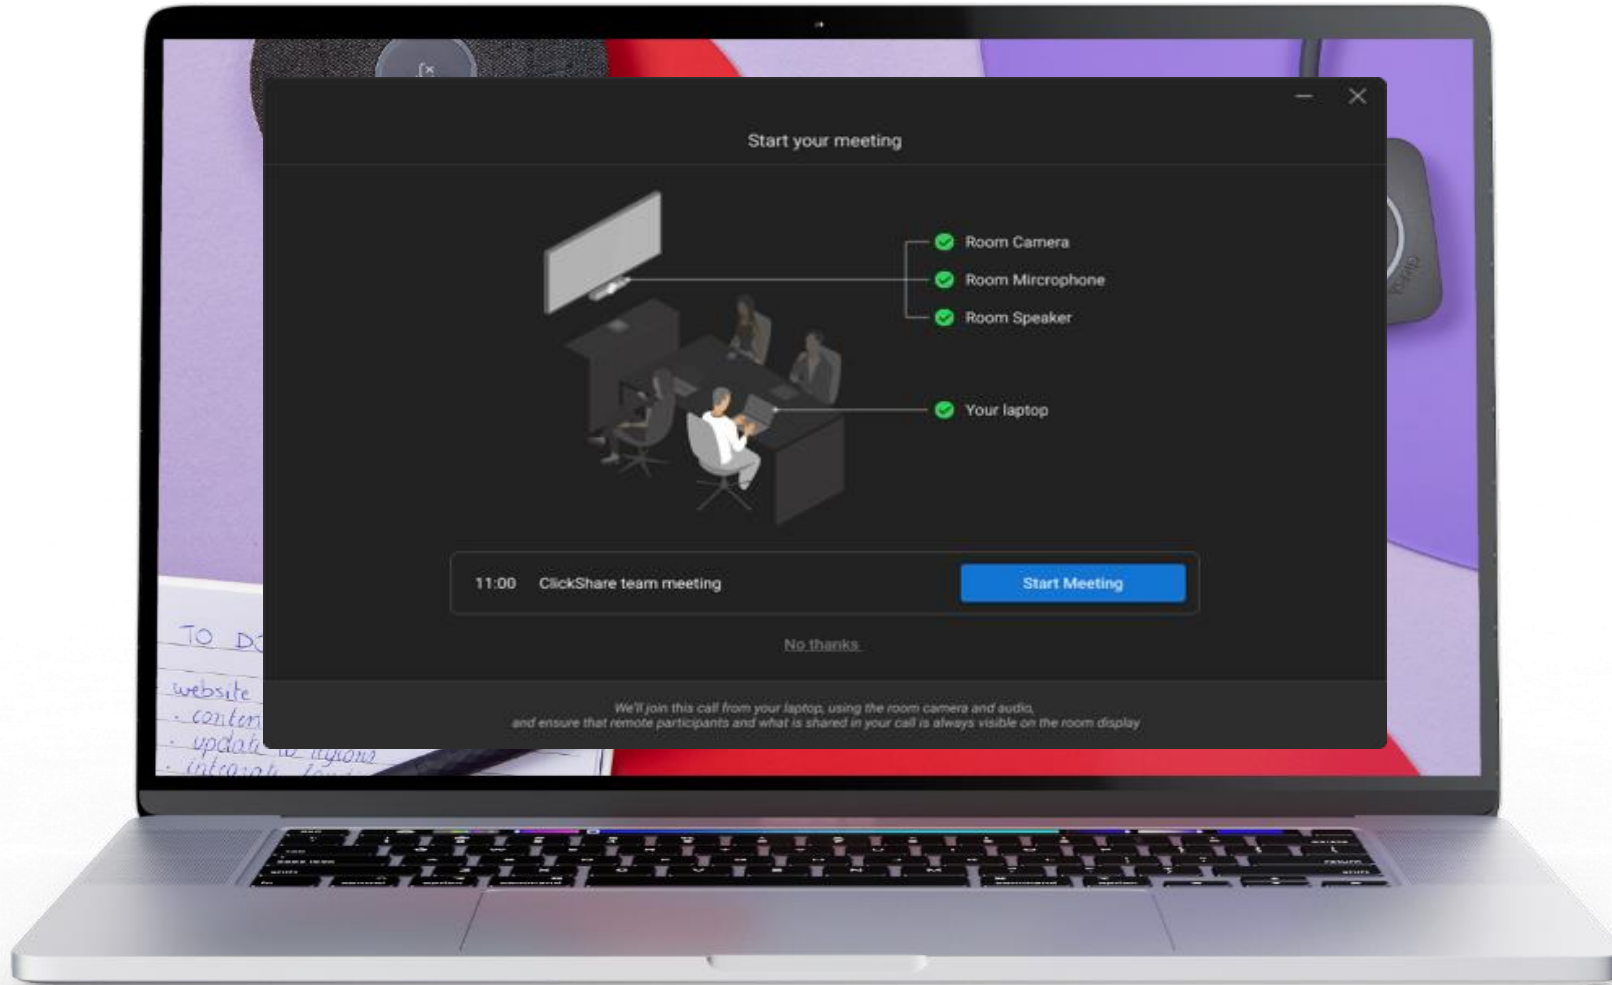

Immediate overview of the meeting room booking,
ideal for huddle spaces and comfort cruisers

Only O365 room accounts are supported at this moment.
Configuration can be done in XMS cloud only.

1-click user experience

1, 2, 3, 4, ... **5 years**
Peace of mind

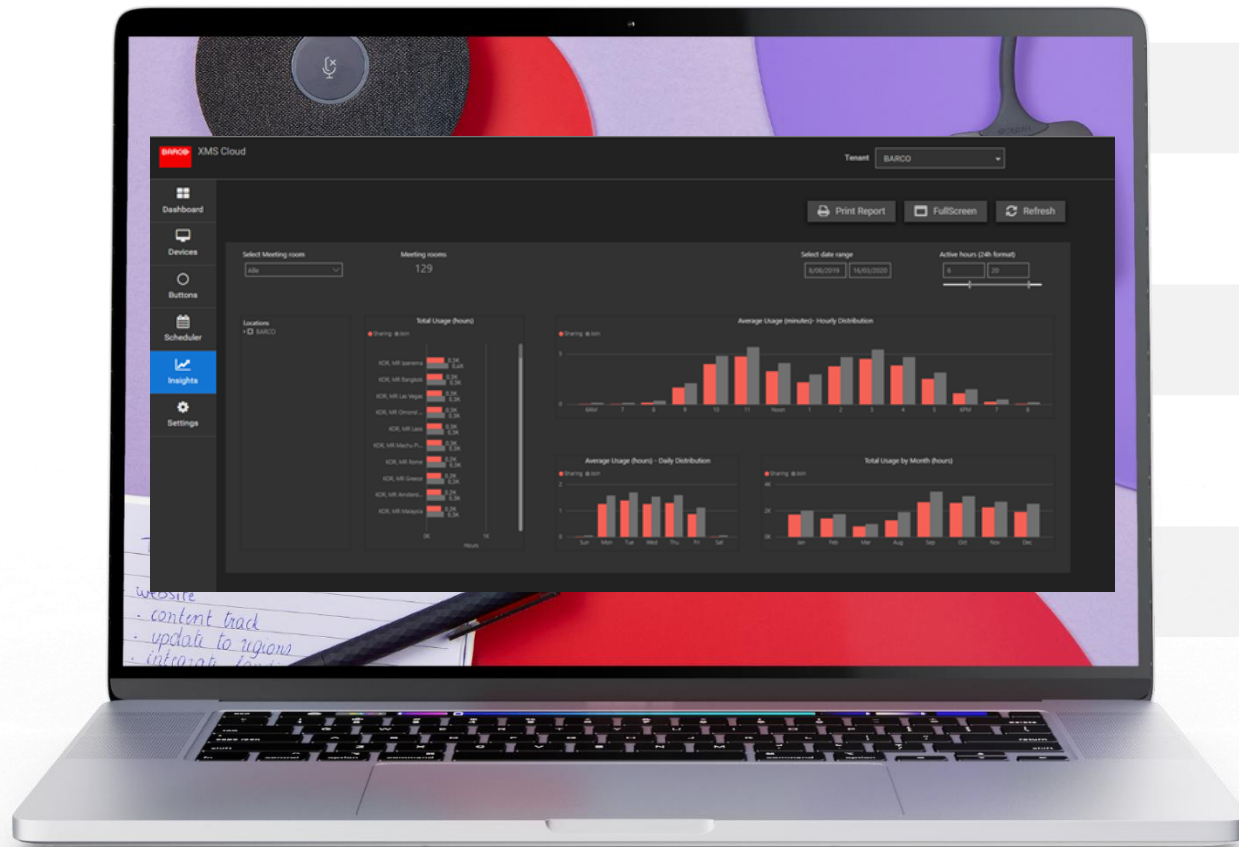

SmartCare = no worries

A service package that provides your company with budget predictability, swift hardware replacement and expert support for up to 5 years.

Requires product registration.

Install, configure & manage with XMS

XMS Cloud

XMS used as a cloud-based SaaS solution

XMS Edge

XMS installed as a local Virtual Machine

XMS Edge + XMS Cloud

A hybrid solution, unifying the communication with only a single point of communication

ClickShare

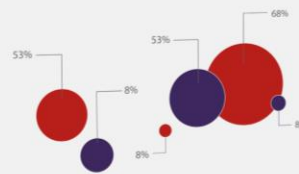

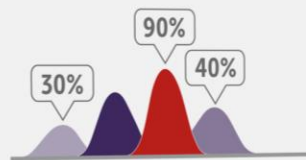

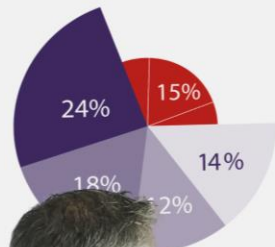

Great
things
happen
when
people
click

CX-50 ideal for the 'High Impact Meeting Room'

Regional data

Last year, we saw strong performance in Q1 and Q2. There was dip in Q4 due to market conditions but we saw positive results in Q4

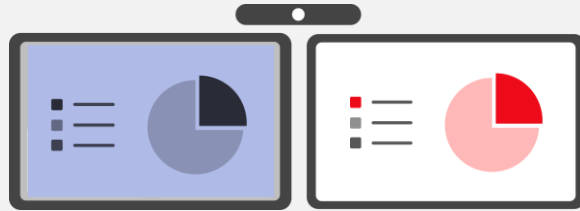

CX-50 Gen2 highlights

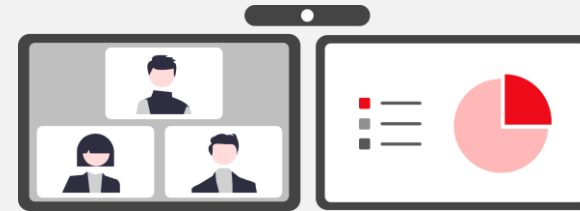

Main scope

Support for dual screen

Many meeting rooms are now equipped with two displays

Content & talking heads side-by-side

Improve meeting equity by keeping remote participants on screen

Simplified connection

Support for Power Delivery & DisplayPort Alternate Mode USB 3.1

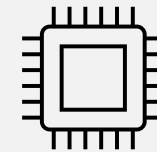

@4K @30fps

Wired room dock for conferencing

While wireless conferencing delivers a simple and cable free user experience there are some reservations to purely rely on the wireless approach

Improved chipset

More powerful chipset
Better overall performance for Sharing and camera processing quality

First barco carbon-neutral product

Partnering with certified agencies, Barco guarantees the neutrality of the carbon footprint of the product

To calculate the carbon footprint of the product, a full life-cycle analysis (cradle-to-grave) made up of all the activities associated with our product has been performed, it includes the following stages:

Extraction and production of materials;

Transportation of raw materials and;

Production (or service provision).

Distribution;

Product use and;

Disposal/recycling.

At each stage, the analysis includes GHG emissions resulting from any material inputs to, or outputs from, the process. These include:

Energy use;

Transportation fuel;

Direct gas emissions (refrigerant losses from air conditioning units) and;

Waste.

Trade-in (old against new)

With a sustainable design

Smart eco design performance has been realized in the following domains:

Energy efficiency: the new ClickShare Button scores significantly higher in power efficiency than its predecessor and the Base Units comply with the strictest requirements for standby mode.

Material use: non-paint plastics were used in the materials of both Button and Base Units. In addition, halogen-free PCB is the preferred material for the Button.

Packaging and logistics: packaging materials were optimized on what the weight, size and transport of products is concerned. Our new Button is 20% lighter than its predecessor and decreases its ecological footprint in shipping.

Design for recycling: ClickShare Present is to be smartly designed: it contains less parts and can easily be disassembled for recycling.

What is the Name of the best Product for your Meetingroom?

1. HDMI Wire incl. Adapter
2. MS Miracast incl. Dongel
- 3. Barco ClickShare**
