

# 360° cloud backup.

**Your backups stored redundantly and securely off-premise. Are you lacking the proper ways to complete your backup concept by outsourcing your backup outside of your environment? Store your backups and replicate virtual machines in Bechtle's secure and highly-available Swiss data centre without the costs and complexity of setting up and maintaining an external infrastructure.**

360° cloud backup offers you a quick and secure option for backups, replications, and recovery in or from Bechtle Swiss Cloud. Our specialists accompany you from design to configuration for your backup environment and support you with recoveries.

- Quick and disaster-proof replication of your backup
- High security through the Bechtle redundant and comprehensive security infrastructure, and encryption of data stored there.
- Data stored on highly available data storage, and an additional geo-redundant securing of data in the Bechtle backup data centre.
- In the event of a disaster, data is delivered to the customer on storage media or recovered quickly on systems in the data centre
- No more hassle of storing on tape etc.
- No more risk of data being incorrectly stored and not being able to be restored
- Storage of your backups and replication of physical and virtual systems in the Bechtle data centre

Quickly and securely store your important backup data in Bechtle Swiss Cloud and benefit from a comprehensive service from design to rapid recovery in case of emergency.
