

Microsoft Training Portal

A Bechtle Packaged Solution

The Microsoft portfolio is vast, so to maximise return on investment and productivity, Bechtle can provide an end-user training portal.

The portal covers the entire suite of Microsoft online services, which offers continuous learning and removes the hands-on training from HR/IT teams. This user-friendly training tool will demonstrate, to the point video tutorials produced by Microsoft's Most Valuable Professionals (MVP's).

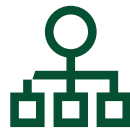

The Bechtle online training portal gives you access to virtual experts at your fingertips 24/7, this will help improve end user's understanding of Microsoft services, increasing productivity.

From an administration perspective, you can assign learning paths to individuals and groups to match their available functionality and track progress on a single-pane dashboard.

1. Onboard

Bechtle will work with you to onboard your business and users.

2. Pilot

Track uptake and activity with a handful of users from across the business.

3. Rollout

Integrate with your new starter onboarding process and provide access to departments of your choice.

4. Manage

Regularly check the progress of your users and award key achievements.

WHY CHOOSE THIS PACKAGE?

- Fully tailored online training portal with company logos, customised product searches.
- Regularly updated content. New products/features available, supporting end users to evolve with the technology.
- On-demand training available to complete when convenient, and in a preferred language.
