

360° antispam.

Innovative e-mail protection without the high costs. 360° antispam makes it very easy for companies to filter out spam messages, shrinking e-mail threats dramatically. This innovative solution – based on a trailblazing technology that protects more than 300 million e-mail users – provides comprehensive protection that can benefit your company.

360° antispam reliably protects your employees' e-mail accounts against spam. With a high success rate of 95%, productivity will no longer be hindered by unwanted electronic mail. Security measures include the continuous monitoring of accuracy rates and automatic monitoring of all potential error detections. Only receive the e-mails you really need to.

- Active monitoring with Workflow
- Spam and virus protection service
- Success rate of 95%
- Filters and algorithms updates every 10 minutes
- Direct redundant connection to the internet backbone
- E-mails cached in the event of local problems
- Reducing the load on your system
- Professional support from the Service Desk
- Active monitoring of the service
- All updates and developments included

More than 80% of e-mail traffic consists of spam. The associated costs and security risks are continuing to rise at an alarming rate. It is therefore just as important to have a professional solution that actively combats this trend and offers secure protection.
