EARNINGS POSITION

In the third quarter of 2023, the macroeconomic conditions remained challenging. Nevertheless, the Bechtle Group once again achieved profitable growth in the period from July to September.

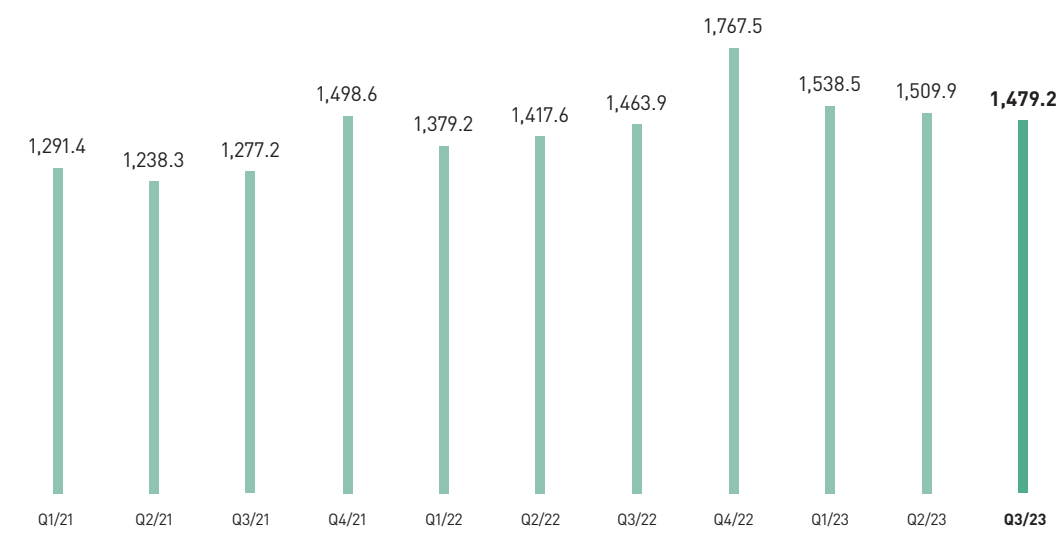

As of 30 September, the order backlog amounted to €1,421 million (prior year: €1,622 million). Of this amount, the IT System House & Managed Services segment accounted for €1,196 million (prior year: €1,281 million) and the IT E-Commerce segment for €225 million (prior year: €341 million). Compared to the prior quarter (€1,410 million), the order backlog remained almost unchanged. Incoming orders underwent a noticeable increase of 18.3 per cent in the third quarter.

From July to September 2023, the business volume went up by 6.0 per cent, with organic growth of 4.6 per cent. At 10.8 per cent, the IT System House & Managed Services segment once again achieved double-digit growth. Due to the lingering purchasing reluctance of a wide range of customers, especially in the field of conventional hardware, the IT E-Commerce segment recorded a decline of 3.5 per cent.

Year-on-year, the revenue went up 1.0 per cent to €1,479.2 million. At -0.7 per cent, the organic performance was slightly negative. The reason for this development and the relatively high discrepancy between the business volume and the revenue in the third quarter was the successful expansion of our software business. In the third quarter of 2023, we realised a number of high-volume software projects. However, according to IFRS 15, we are only allowed to show their margin as part of the revenue.

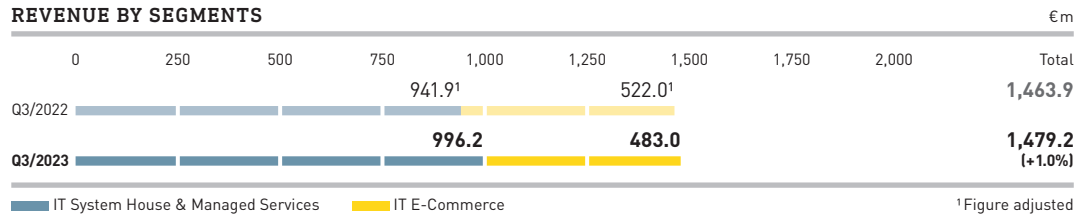

GROUP REVENUE

€m

In the IT System House & Managed Services segment, the revenue climbed by 5.8 per cent. This development was driven by the almost exclusively organic revenue increase of 22.2 per cent abroad. In the IT E-Commerce segment, the revenue dropped by 7.5 per cent. Here, the challenging economic framework conditions and the associated higher purchasing reluctance of our medium-sized customers continue to have a strong impact.

REVENUE BY SEGMENTS

From the regional perspective, the revenue of the companies abroad underwent growth of 3.4 per cent, while the domestic companies more or less stagnated at –0.3 per cent. As the software business has performed very well particularly in Germany, the application of IFRS 15 obscures the actual relative performance in terms of the segment development.

REVENUE – GROUP AND SEGMENTS

€k

	Q3/2023	Q3/2022	Change	9M/2023	9M/2022	Change
Group	1,479,155	1,463,872	+1.0%	4,527,599	4,260,627	+6.3%

International	564,517	546,195	+3.4%	1,757,414	1,611,785	+9.0%
IT System House & Managed Services	996,198	941,883¹	+5.8%	2,974,725	2,639,936¹	+12.7%
IT E-Commerce	482,957	521,989¹	–7.5%	1,552,874	1,620,691¹	–4.2%

¹ Figure adjusted

At 6.9 per cent, gross earnings increased at a higher rate than the revenue. The gross margin thus increased from 17.9 per cent to 19.0 per cent. Material costs declined by 1.9 per cent. This shows the said expansion of our software business, whose margin we are allowed to account for as revenue, and the consistently high demand for our services in connection with sustainable IT environments. Other operating expenses, which are included in the cost of sales, also underwent a decline of 2.5 per cent.

The expenses increased at a disproportionately high rate in both functional areas, Sales and Administration. Distribution costs went up by 10.7 per cent. The respective expense rate increased from 6.8 per cent to 7.4 per cent. Administrative expenses went up by 7.8 per cent. Accordingly, the expense rate increased from 5.6 per cent to 6.0 per cent. While the increase in distribution costs was attributable mainly to the higher personnel expenses, the main factor that drove up the administrative expenses was the disproportionately high increase in other operating income. This was associated with central journal entries in this item. Other operating income increased by €5.9 million. As in the prior quarters, this item was affected by factors such as the higher marketing contributions from vendors.

Owing to the favourable trend of the cost of sales, EBITDA went up by 9.3 per cent. The EBITDA margin increased from 8.0 per cent to 8.6 per cent.

Due to acquisitions and other factors, depreciation and amortisation increased by 14.0 per cent and amounted to €31.4 million as of the end of the quarter. As previously, the depreciation of property, plant and equipment accounted for the greatest share of the depreciation and amortisation. This item went up by €2.6 million to €26.3 million.

EBIT went up 7.8 per cent to €96.4 million. In the reporting quarter, the margin amounted to 6.5 per cent, compared to 6.1 per cent in the prior year.

The EBT performance was similar. This item increased by 6.4 per cent to €93.9 million, resulting in an EBT margin increase from 6.0 per cent to 6.3 per cent. The stable margin of 5.9 per cent achieved in the nine-month period is comfortably in line with our forecast for the year as a whole, which projects a margin at about the same level as in the prior year (5.9 per cent).

EBT AND EBT MARGIN

€m and %

The tax rate went up from 28.1 per cent to 28.9 per cent. Earnings after taxes went up by 5.3 per cent to €66.8 million. Earnings per share amounted to €0.53, compared to €0.50 in the corresponding prior-year quarter.

The earnings situation in the segments was as follows:

EBIT in the IT System House & Managed Services segment increased by 13.8 per cent to €66.3 million. This item was affected by the above-mentioned higher demand for software and services and the increase in marketing contributions. The EBIT margin thus increased from 6.2 per cent to 6.7 per cent.

In the IT E-Commerce segment, EBIT declined by 3.3 per cent to €30.1 million. The EBIT margin increased slightly from 6.0 per cent to 6.2 per cent. Despite the restrained operational performance, the material costs developed at a lower rate than the revenue, due especially to the higher software share. This had a positive effect on the margin.

EBIT – GROUP AND SEGMENTS						€k
	Q3/2023	Q3/2022	Change	9M/2023	9M/2022	Change
Group	96,402	89,395	+7.8%	273,491	254,520	+7.5%
IT System House & Managed Services	66,279	58,248	+13.8%	186,016	159,136	+16.9%
IT E-Commerce	30,123	31,147	-3.3%	87,475	95,384	-8.3%

ASSETS AND FINANCIAL POSITION

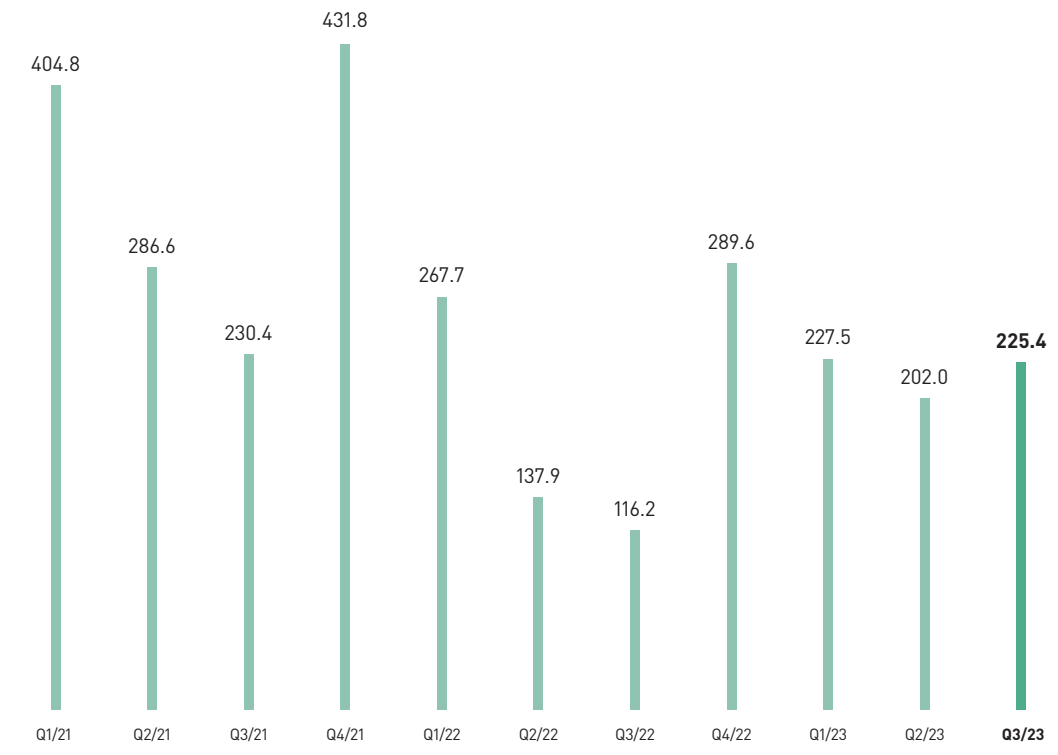

As of the reporting date of 30 September 2023, the balance sheet total of the Bechtle Group amounted to €3,382.6 million, slightly less than as of 31 December 2022 (€3,447.9 million).

On the assets side, non-current assets went up by 15.4 per cent to €1,287.3 million. Due to acquisitions, the goodwill, in particular, increased by €86.1 million. Property, plant and equipment went up as well, namely by €71.3 million. The capitalisation ratio climbed to 38.1 per cent, from 32.3 per cent as of 31 December 2022.

Current assets dropped by €237.4 million to €2,095.3 million as of the reporting date. Inventories decreased by €40.9 million or 6.7 per cent and amounted to €566.8 million as of 30 September 2023. Trade receivables declined even more, namely by €182.1 million or 15.1 per cent. This positive development was also reflected in our average DSO (days sales outstanding), which came down from 41.9 days in the prior year to 41.2 days in the first nine months of 2023. At €225.4 million, cash and cash equivalents remained almost unchanged at a very comfortable level.

LIQUIDITY (INCLUDING TIME DEPOSITS AND SECURITIES)

€m

Due to the said declines in inventories and trade receivables, the working capital dropped from €1,112.4 million to €935.7 million as of 30 September 2023. In relation to the business volume, the working capital dropped from 21.8 per cent as of 30 September 2022 to 16.7 per cent.

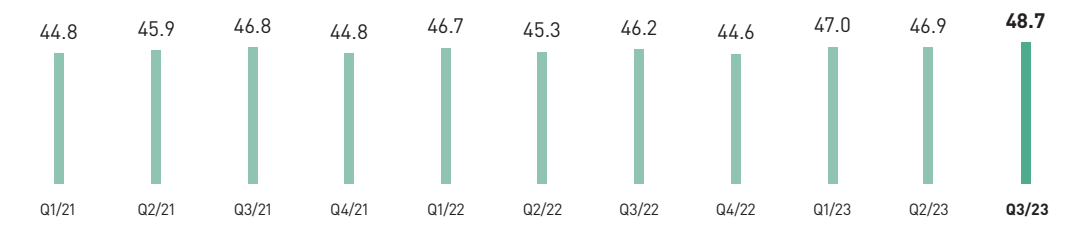

On the equity and liabilities side, non-current liabilities underwent merely a slight change and amounted to €497.6 million as of the reporting date.

Current liabilities declined by €208.3 million to €1,236.3 million as of 30 September 2023. As a result of the substantial reduction early in the year, trade payables dropped by €161.3 million. Other liabilities also declined, namely by €69.6 million or 18.3 per cent. This was due to the lower liabilities to personnel and lower VAT liabilities.

The equity increased by €110.4 million. Our equity ratio went up from 44.6 per cent as of 31 December 2022 to 48.7 per cent as of the reporting date. The annualised return on equity amounted to 16.8 per cent, after 18.2 per cent in the corresponding prior-year period.

EQUITY RATIO

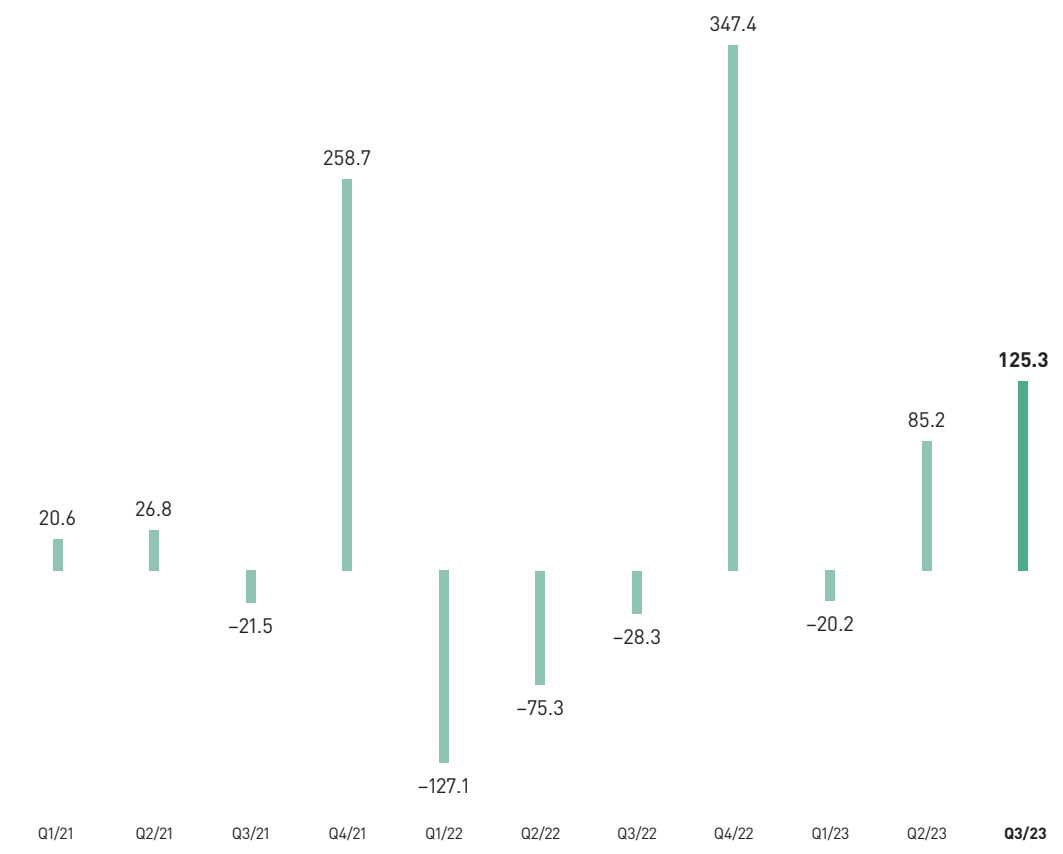

%

In the period from January to September 2023, the cash flow from operating activities amounted to €190.2 million, compared to –€230.7 million in the corresponding prior-year period. The ongoing reduction of inventories and the reduction of trade receivables resulted in a total cash inflow of almost €250 million (prior year: cash outflow of €228 million). The slight increase in the cash outflow from the reduction of trade payables did nothing to change this positive development. The cash outflow from trade payables even declined somewhat in the third quarter. Overall, the cash flow from operating activities was €125.3 million in the third quarter, compared to –€28.3 million in the corresponding prior-year period.

CASH FLOW FROM OPERATING ACTIVITIES

€m

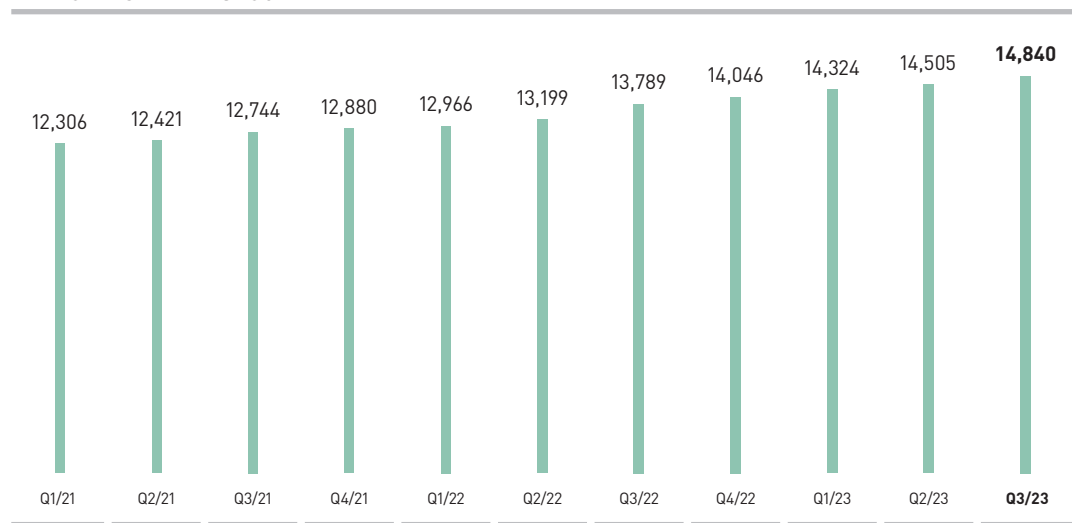

At –€98.5 million, the cash flow from investing activities was only slightly below the prior-year figure of –€108.3 million. The outflows for acquisitions and investments were higher than in the prior year, which was balanced by an inflow from the sale of time deposits and securities. The cash flow from financing activities amounted to –€96.9 million, after +€16.2 million in the corresponding prior-year period. Above all, the cash paid for the repayment of financial liabilities was higher than in the prior year.

Despite the higher outflow for acquisitions, the free cash flow from January to September 2023 amounted to a positive figure of €28.9 million. This represents a substantial improvement over the prior-year figure of –€339.6 million.

PEOPLE AT BECHTLE

As of the reporting date of 30 September 2023, the Bechtle Group had a total of 14,840 employees, This represents an increase of 1,051 people or 7.6 per cent compared to 30 September 2022. A large portion of this increase is attributable to acquisitions in both segments. A total of 518 people joined Bechtle in this way. Without taking the acquisitions into account, the headcount increase amounted to 3.9 per cent.

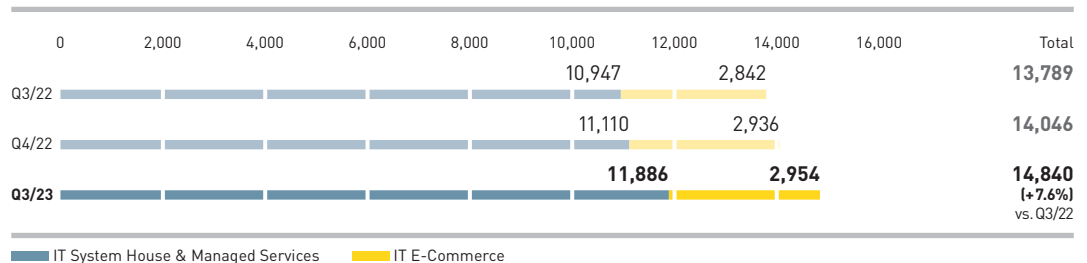

EMPLOYEES IN THE GROUP

In the IT System House & Managed Services segment, the number of employees went up by 939 compared to 30 September 2022, an increase of 8.6 per cent. The rate increase in per cent in the German companies was almost the same as in the international companies.

In the IT E-Commerce segment, the number of employees went up by 112 compared to 30 September 2022, an increase of 3.9 per cent.

EMPLOYEES BY SEGMENTS

Expressed in full-time equivalents (FTE), an average of 13,959 employees worked for Bechtle from January to September 2023, an increase of 1,265 people or 10.0 per cent over the corresponding prior-year period.

As of 30 September 2023, Bechtle had 865 young trainees, an increase of 50 apprentices and students on integrated degree programme compared to the previous year.

At the beginning of the new training year on 1 September, 299 young colleagues embarked on their career with Bechtle, another record figure.

FORECAST

So far, the year 2023 has been marked by strained economic framework conditions and major uncertainties with regard to further macroeconomic development. Moreover, the mood indicators for the economy are only recovering slowly, however they remain at a low level. Noticeable improvements in these framework conditions are unlikely to occur over the rest of the year. Bechtle has performed very well against this challenging backdrop. Therefore, we are confirming the forecast we published in March 2023, according to which we intend to increase the revenue and earnings considerably (5 to 10 per cent) and keep the margin at more or less the same level as in the prior year. Despite the persistently challenging economic situation, we remain confident regarding our year-end business.
