Tenant Quick Security Check.

Let our certified experts review your Microsoft 365 environment so that you can get the most out of it. You will be provided with the results of the analysis and shown the potential, which we will then be happy to implement directly for you.

This service focuses on the verification of your Azure identities and online services.

All you need is at least one of the following existing Microsoft license plans (or comparable):

· Microsoft 365 Standard / Microsoft 365 Premium
· Office 365 E3 / E5
· Microsoft 365 E3 / E5

Your advantages:

· Suitable for all company sizes - whether 10 or 10,000 users

· Reduction of your IT costs - access to competent and Microsoft-certified experts

· High quality and reliability thanks to established and standardized processes

· Maximum security and cost optimization by exploiting the potential we have identified

Included service components:

Azure Identity Management

· Verification of Azure AD user accounts in accordance with the agreed security guidelines.

· Privilege check of the configuration for increased protection through: Number of user accounts with admin rights, conditional access and Azure AD Privileged Identity Management.

· License check for inactive licenses and barely used services (Consumption Overview).

Office 365 Security

· Provision of a Bechtle Standard Security Status report with recommendations for hardening the Microsoft / Office 365 tenant.

· Subsequent 30-minute security meeting (remote) to explain the results of the delivered report.

The workplace of the future is mobile.

Always work together efficiently as a team.

Secure access to data everywhere.
