

IAM Scoping - The building block for sustainable success in IAM projects.

Unleash the full potential of your Identity & Access Management (IAM) projects with IAM Scoping from Bechtle! This standardized architecture project offers you a practice-oriented introduction to the topic of IAM. Hand in hand, we develop an IAM architecture that is tailored to your needs and helps your IAM projects to succeed.

Do you know this? It's the end of the month and in three days new employees will be starting at your company. Your IT is under water and there is a shortage of specialists. In general, your recruitment process is taking too long and often the devices, authorizations or accounts are not ready in time. Do you have an overview of who currently has access to your critical company data and systems? Who has set up this access and why? Is all access removed when someone leaves your company? Key questions that you are not alone in asking. We have the solution to your questions: Get started with IAM today and contact our Bechtle IAM Competence Center. Find out what possibilities an IAM system can offer and how it can help you solve your problems and support your IT projects.

IAM SCOPING - THAT'S WHAT IT'S ALL ABOUT.

IAM Scoping is the first step towards a more secure future. Learn the basics of terms such as IAM, PAM, HR, ERP, Directories, Entra, PIM and how they can move your organization forward. Recognize which stakeholders need to be involved so that your new IAM system can develop its full potential. Work with us to develop the optimal IAM architecture for your company.
