Deploy - Journey to Windows 11
In partnership with Bechtle

As today's workforce becomes increasingly mobile, providing consistent support across office and remote environments can be challenging - especially when managing the transition from legacy equipment. Bechtle offers a range of flexible deployment and migration services to ensure a smooth and efficient experience for your users.

Office-Based Deployment: Techbar Experience

Bechtle's unique Techbar solution provides a dedicated, branded space within your office to manage device refresh programs. Users are allocated time slots to transition from old to new devices or complete software upgrades. The setup includes:

- A fully equipped Techbar station.
- Clear signage for visibility and navigation.
- On-site technical engineers to support the entire process.
- Already have a space? We can provide skilled resources to staff your desk, freeing up your internal IT teams for strategic priorities.

Warehouse Storage & Image Deployment

For organisations with limited on-site space, Bechtle offers secure warehousing and staged deployment services. Devices can be stored offsite, imaged with your required applications, and called off in batches for phased rollouts - ensuring flexibility and control.

Remote User Support

Bechtle simplifies remote deployments with a doorstep exchange service. Users receive a replacement device and return their old one using the same packaging. Our drivers seal and collect the device on the spot, with full tracking available for peace of mind.

IT Asset Disposition (ITAD)

Upgrading doesn't have to mean waste. Bechtle's ITAD services help you recover value from legacy devices:

- Monetise devices that can't support Windows 11 by reselling those with residual value.
- Refurbish and upgrade eligible devices to Windows 11-ready stock.
- Secure disposal through on-site shredding, certified data erasure, and compliant recycling.
- This approach supports both budget efficiency and sustainability goals.

End-to-End Project Management

Migrating to Windows 11 can be complex. Bechtle provides full project management to reduce the burden on your internal teams. From planning and logistics to execution and reporting, we ensure a seamless transition with minimal disruption.
