Today and tomorrow.

 **BECHTLE**

Education is operating under increasing constraints thanks to the: transition to remote teaching and learning, tight budgets and evolving student needs to name a few.

To adapt to this radical shift, you need a strong, scalable and agile IT infrastructure that will help you find new ways to operate sustainably, be attractive to students, enhance the quality of services you provide and retain teachers and learners.

Traditional learning methods are a thing of the past.

With campuses deserted due to the coronavirus pandemic, IT proved critical in delivering your institution's mission

Building a connected experience.

Many students doubt the effectiveness of remote learning, which is why you need to develop models to connect educators and their students throughout their training.

Growing your digital channels.

The power of your teaching programmes now relies on digital venues that need to offer seamless communication and collaboration, and ease the transition from campus to home learning and teaching.

Ensuring sustainability for your institution.

You need to find new ways of making your organisation fairer and more sustainable as funds continue to erode, resources are limited, and non-traditional players enter the market.

Upgrade your IT with Bechtle for better learning.

The Bechtle team puts your student and faculty experience at the centre of your transformation—helping you to build a technological foundation that supports hybrid learning models, streamlines your internal operations and covers all aspects from student-facing to back-office.

Our **cloud-powered solutions** provide your institution with the competitive edge it needs to diversify to boost revenues and deliver outstanding teaching and learning experiences.

OPTIMISE OPERATIONS.

MODERN IT INFRASTRUCTURE.

- Agile cloud IT architecture that offers custom educational services and solutions
- Guaranteed continuity of the experiences you deliver
- Lower costs and less complex IT

MODERN WORKPLACE.

- Cloud-based productivity tools that ease communication and collaboration
- Intuitive and accessible technology that boost stronger engagement
- Advanced security, multiple layers of authorisation and unified access to manage data securely

DELIVER A GRADE A LEARNING EXPERIENCE.

MODERNISED LEARNING.

- Advanced communication tools to deliver modern campus engagement models
- Online classrooms that help students and teachers connect
- Personalised learning that keeps students motivated and engaged

AI-POWERED BOTS.

- Support available 24/7 to improve the student experience
- Fewer queries, taking pressure off staff
- Greater savings thanks to intelligent automation

DESIGN A SECURE AND CONNECTED CAMPUS.

DATA AND ANALYTICS.

- Access to previously inaccessible data to realise new opportunities
- Confident and informed decision-making thanks to full data visibility
- New insights into performance, teaching, learning and admin, fostering innovation and optimisation of the campus experience

SMART BUILDINGS.

- Safe and secure on-site and online environments with the use of IoT, edge data and digital twins
- Access to facilities' occupancy data, crowd control and security insights, allowing for full control of internal campus operations
- Greater savings due to resource optimisations such as in buildings maintenance and electricity usage

The future of education is digital.

Our team understands that seamless learning experiences matter more than seamless back-end operations. We help you assess, plan, build and run future-focused IT solutions so you can focus on the teaching, rather than the tech.

Guiding you on your transformation.

We help you design the right solution, prepare your institution for change, implement it and continuously optimise your new setup.

We offer end-to-end solutions.

Our holistic solutions meet the increasing demand for innovative and cost-effective services tailored to higher education.

You benefit from our knowledge and expertise.

With over 35 years of experience and our Azure Expert MSP and IONOS Platinum Partner statuses, we always see our customers' projects through to their successful conclusion.

We build unique partnerships.

Bechtle counts as one of Microsoft's and IONOS' strongest global partners in the implementation of digital transformation projects.

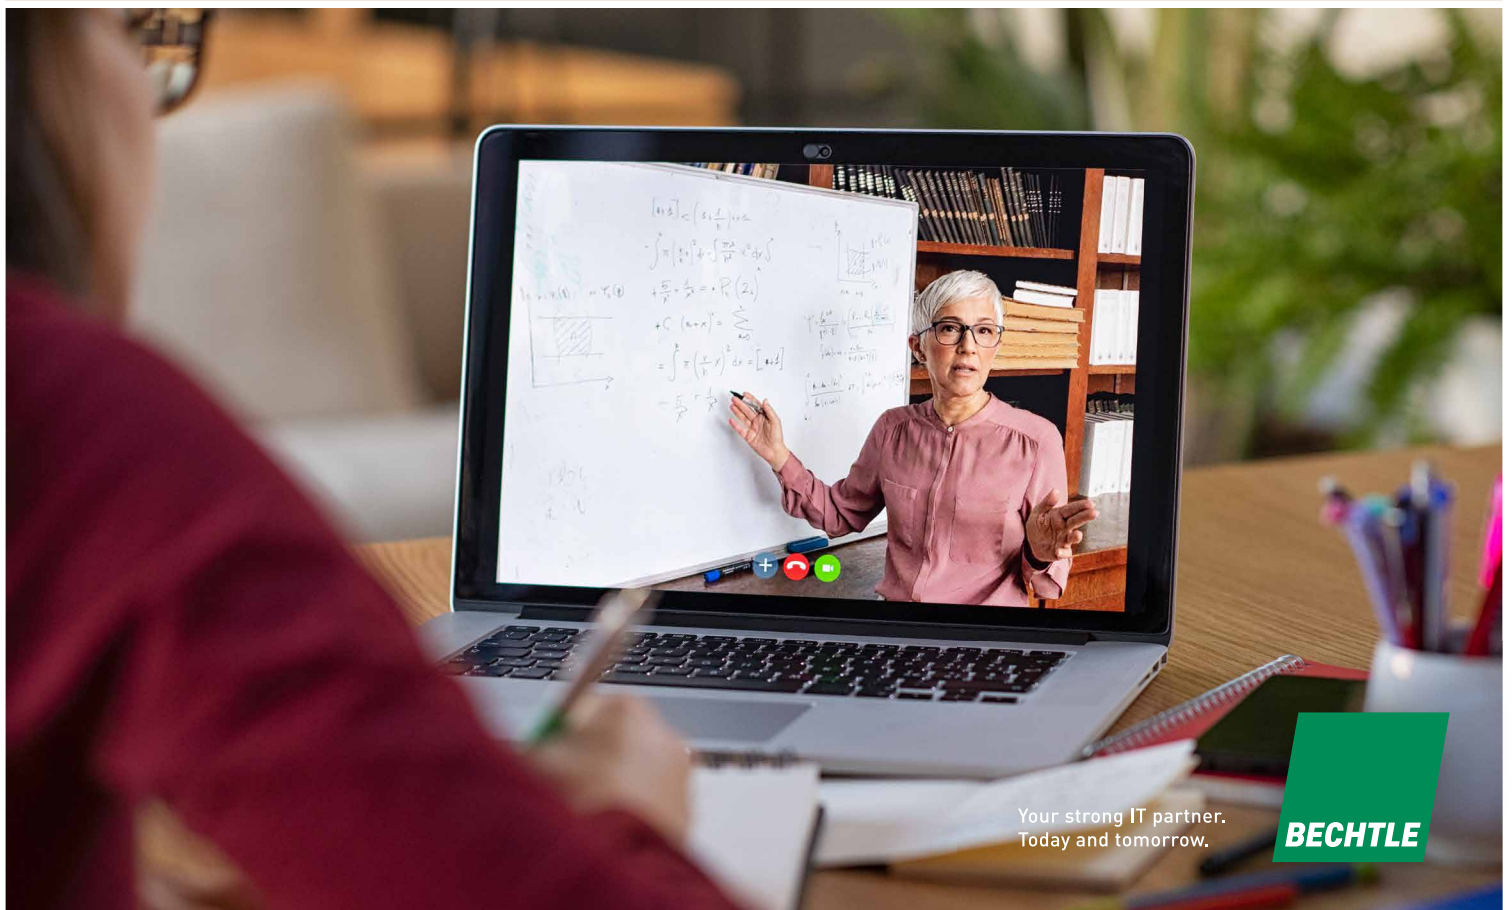

Lay the foundations for tomorrow's success.

Your ability to be successful is based on the opportunities and limitations of your technology architecture.

Make the switch to the cloud and make your data work for you. You'll benefit from configured digital solutions that meet the needs of your institution as well as your students.
