Hybrid Life

Hybrid work is here to stay

97% of organizations will continue to support remote work.

40% of organizations are building additional meeting spaces.

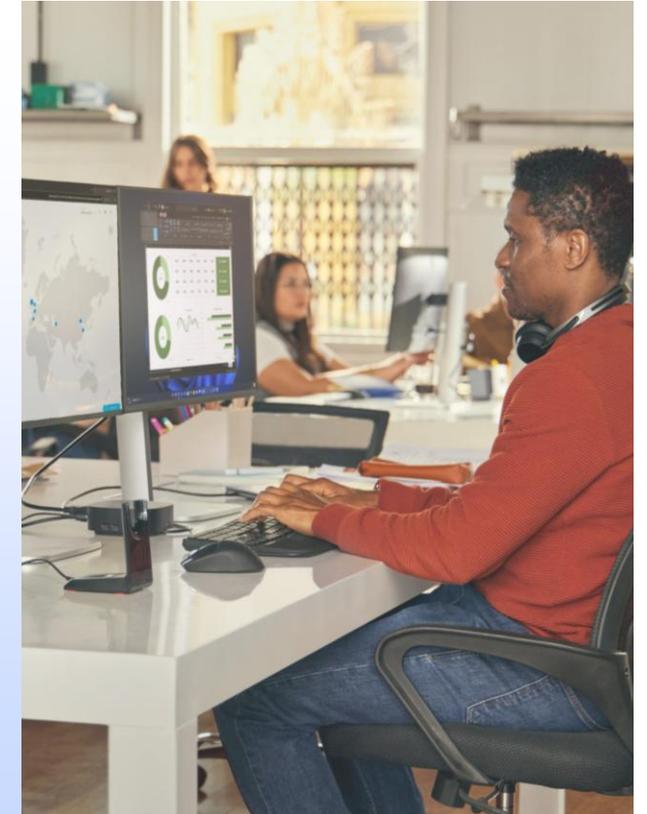

Room-based video devices are the **second most deployed device type**, indicating the rapid video-enablement of meeting spaces.

Meeting room solutions are essential as the connection point between distributed teams

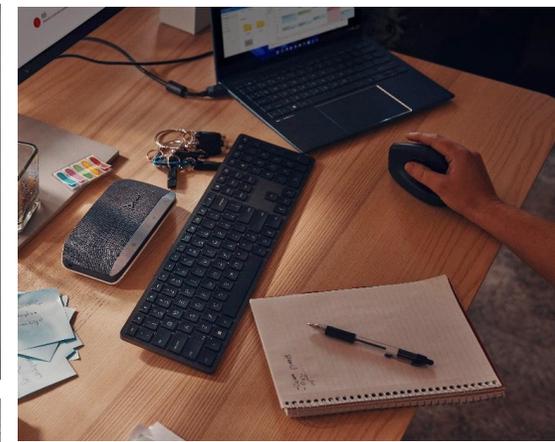

The technology used in meeting rooms is unique yet critical since it has a significant impact on the collaboration experience.

- Everyone in the room needs to be **seen and heard clearly and equally**.
- Every room is different and **needs technology** that will **adapt and scale**.
- Users need to **feel confident and familiar** when joining from a room.

And all these devices (remote and in office) need to be managed by a seamless, unified platform.

Uniquely positioned to deliver the future of work

HP Poly meeting room advantages

Comprehensive and flexible video portfolio

Help create consistent experiences and manageability across any room size, room OS, solution type, and video platform.

Premium audio and video quality

When everyone is seen and heard clearly, meetings become more productive, engaging, and connected.

Streamlined management and analytics

Get rooms up and running more quickly and keep them always available for users.

Videoconferencing Solution

Any room, major UC apps, several setup options

Optimized video quality and optics

Delivering rich, vibrant, true-to-life images that automatically adapt to challenging office lighting conditions.

- Cameras expertly tuned for real-world meeting environments
- Field of view optimized for each room size to keep everyone in frame
- People-first design that enhances natural skin tones and avoids distortion
- Rigorously tested in-house and by third parties to meet high quality standards*

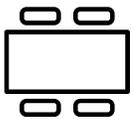

*Learn more about [Microsoft Teams certification](#) and [Zoom certification](#).

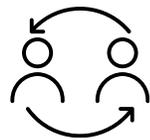

Poly DirectorAI Perimeter

Enhance your meeting experience by setting a perimeter on the camera framing.

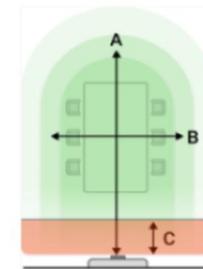

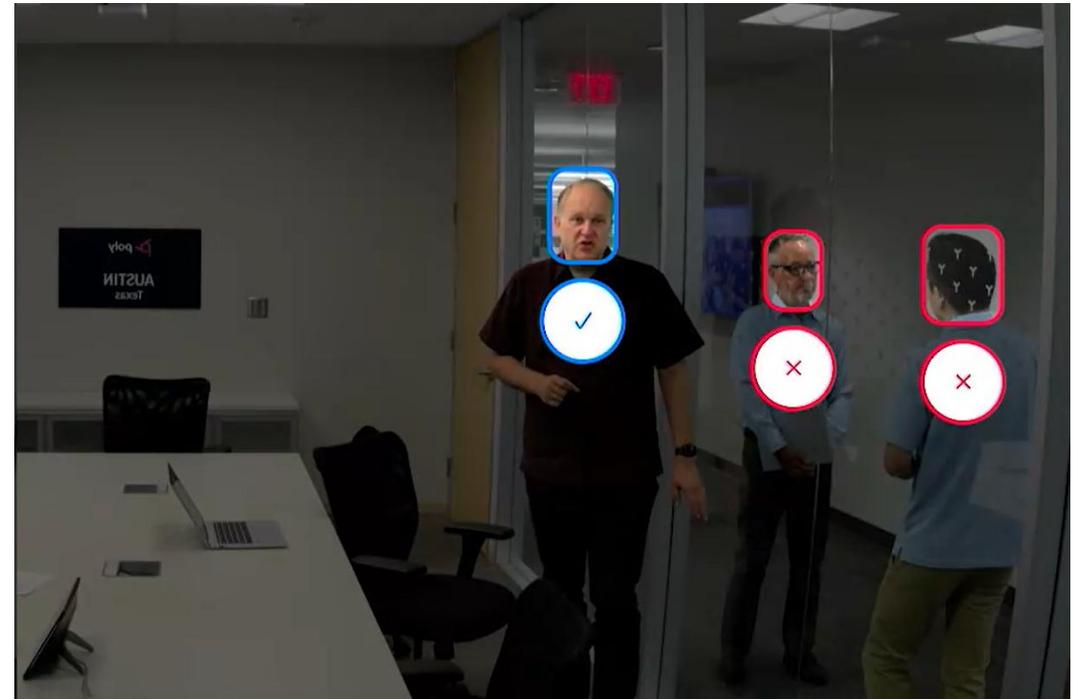

- Meeting spaces that are open or utilize glass walls can present challenges for automatic camera framing.
- DirectorAI perimeter allows you to focus on your meeting while your camera keeps distractions at bay.

Audio Experience

Hear and be heard clearly so you never miss a beat.

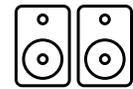

Poly's Legendary Audio

with crisp, room-filling sound made possible by an innovative acoustic chamber design.

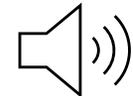

Beamforming Microphone Array

clearly picks up all voices in the room.

Dual Speakers

deliver rich audio that fills the room.

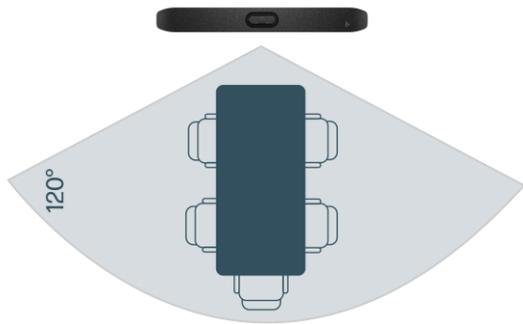

Expansion Mic(s)

Option for even richer audio pickup in rooms with challenging acoustics

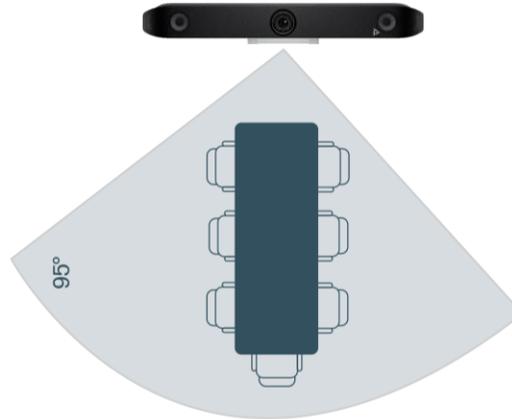

Field of View Matters

Field of View (FOV) Optimized for Each Room Type

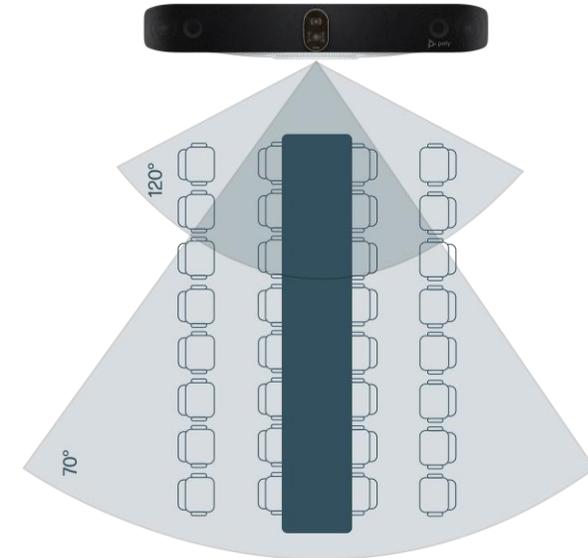

120° HFOV, 5x zoom (Digital)

Optimum for small and huddle rooms

95° HFOV, 5x zoom (Digital)

Optimum for medium sized room

70°/120° HFOV (Dual lens), 7.3x zoom (Digital)

Optimum for large sized rooms

Poly Studio V12 Feature Overview

BEAMFORMING MICROPHONE ARRAY

Crisp, clear voice pickup so you can be confident you're being heard, no matter where you sit

POWERFUL USB VIDEO BAR FOR SMALL ROOMS

USB video bar with powerful camera, mics, and speakers deliver powerful performance to cover small and huddle conference rooms

MADE FOR A BETTER TOMORROW

Contains at least 65% recycled plastic materials¹

DYNAMIC VIDEO EXPERIENCE

Advanced algorithms power the automated camera framing modes - group framing, people framing, and speaker framing

IMMERSIVE ROOM FILLING SOUND

High performance stereo speakers with a unique acoustic chamber design delivers rich audio that reaches all parts of the room

CRYSTAL CLEAR VIDEO

4K, 120-degree, 5x zoom camera ensures everyone in a small room is seen clearly

¹ Recycled plastic is expressed as a percentage of the total weight plastic. Post-consumer recycled is based on the definition set in the EPEAT standard for computers, IEEE 1680.1-2018 standard.

HP Poly Studio A2

Next-gen audio solution that brings best-in-class audio, seamless scalability, and effortless setup to conference rooms.

HP Poly Studio A2 Audio Bridge

HP Poly Studio A2 Table Microphone

**NEXT
GENERATION
AUDIO**

Best-in-class audio

High-quality audio for clear, natural sound and exceptional voice pickup.

Seamless scalability

Effortlessly extend audio coverage across any meeting space.

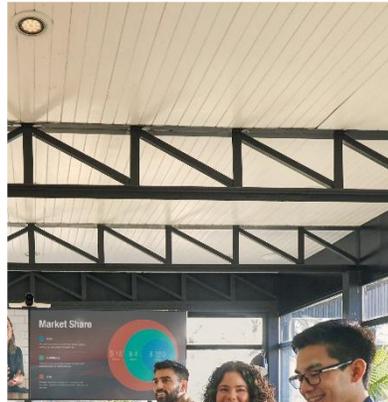

Effortless setup

Simple plug-and-play solution for a streamlined and hassle-free setup.

Works with all next-gen HP Poly video systems

One unified audio solution for all room types and room sizes.

Studio Solution	Room size	Supported Microphones	A2 Audio Bridge required
Studio G62	Custom	Up to 8	Yes
Studio X72 / V72	Large	Up to 4	Yes
Studio X52 / V52	Medium	Up to 4	Yes
Studio X32	Small	Up to 2	Yes
Studio V12	Huddle / Small	1	No

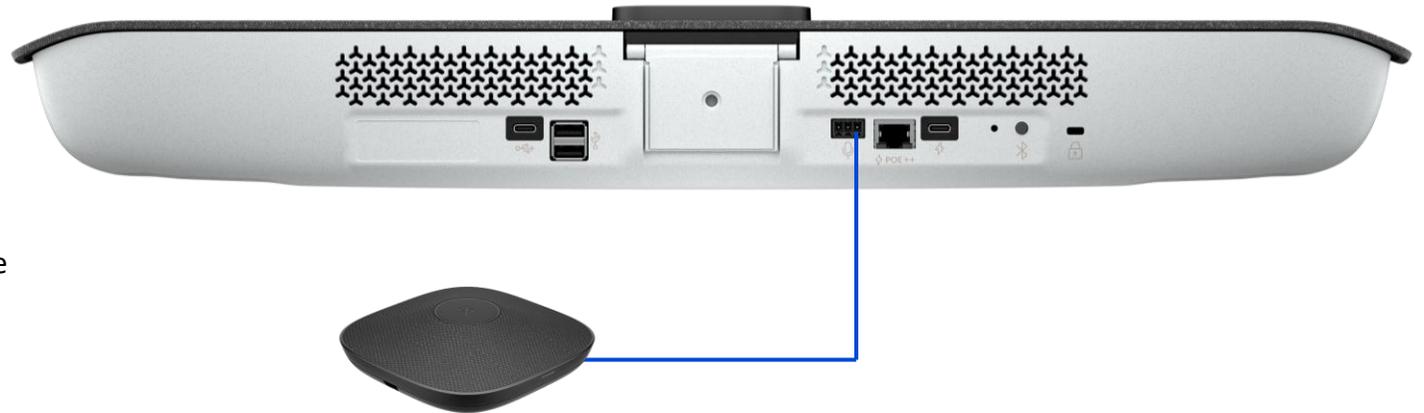

Note: HP Poly Studio A2 audio solutions are not backward compatible. Poly Studio X70/50/30, USB and Poly G7500 will continue to use the existing analogue and IP expansion microphones, respectively.

HP Poly Studio A2 Table Mic Support

Next-gen audio solution that brings best-in-class audio and effortless setup to conference rooms.

HP Poly Studio A2 Table Microphone
(Single A2 Table Mic supported)

Audio pickup for A2 mic -14ft/4.3m radius

**NEXT
GENERATION
AUDIO**

Best-in-class audio

High-quality audio for clear, natural sound and exceptional voice pickup.

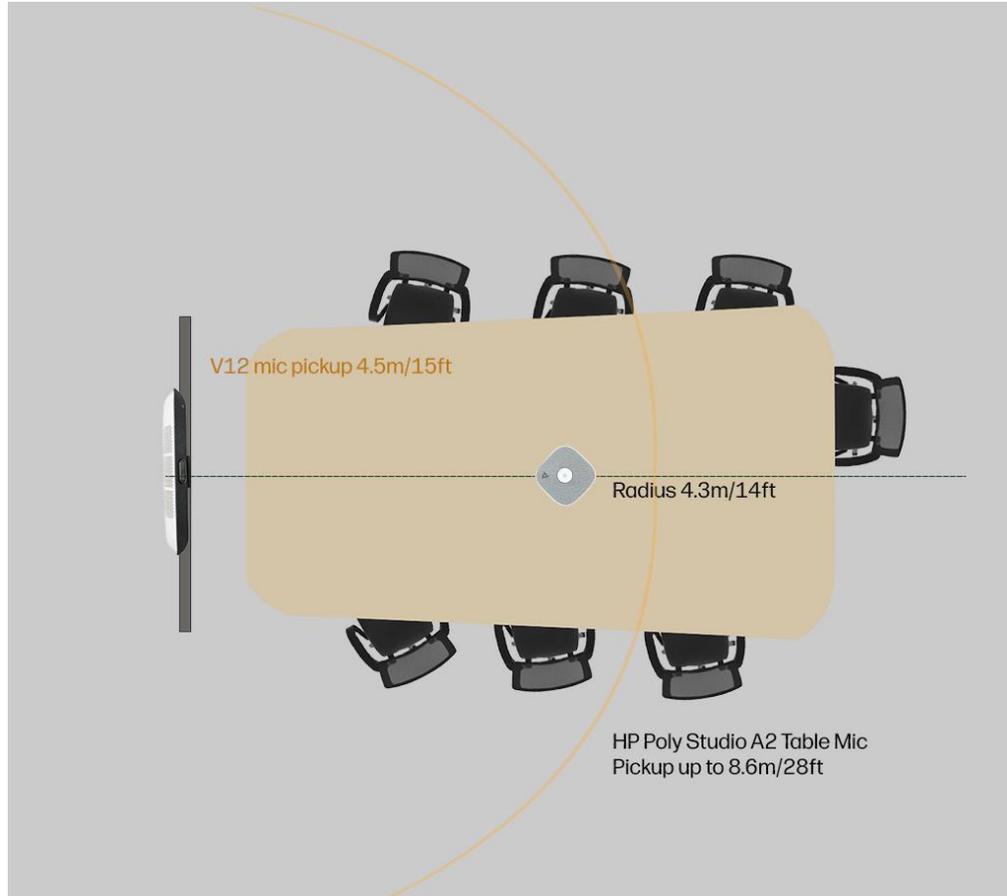

Effortless setup

Simple plug-and-play solution for a streamlined and hassle-free setup.

HP Poly Studio A2 Table Mic

Extended audio coverage to ensure best audio experience

- Four uni-directional cardioid microphone elements
- Auto mic switching (V12 mic and A2 mic) on/off configurable
- Easy to install
- Connects to V12 with 6m (19.7ft) JST to Phoenix cable
*8m/26ft Extension cable support planned with future release

With HP Poly Studio A2 Table Mic

Mic Pickup 8.6m (28ft)

Pick up radius 4.3m/14ft (Poly NoiseBlockAI on)

Pickup radius 1.8m/6ft (Poly NoiseBlockAI off)

Single cable BYOD setup

No fuss, single cable connection

Simply connect the host USB cable on the dock to your laptop to access V12 camera and audio, as well as room display(s).

Keep your laptop charged throughout your meeting

Up to 180W power delivery supported via the host Thunderbolt 4 connection.

Scale easily through HP Poly Lens Cloud management

HP Poly Lens Cloud provisioning ensures the fleet of G6 docks and V12 video bars stay current and consistent.

HP Thunderbolt 4 Ultra 180W G6 Dock	Poly NJ SKU: CA7U8AA (ABA/ABB/ABG/ABJ/ABU/AC4/ACJ)
Host Thunderbolt 4 cable	1m (3.2ft)
Management	Poly Lens Cloud management recommended in conference room settings (G6 Dock, V12)

-Thunderbolt 4 cable to laptop's USB C port for USB and power delivery (180W max)

-HDMI, DP or USB-C (DP Alt) to display(s)
-USB C to V12

Poly Lens Device Management

Empowering your IT staff to do more.

Monitor system uptime

¹Remote troubleshooting and control of devices

²Vyopta integration for even greater insights and analytics

Remotely deploy, manage & auto-update through centralized policies at scale

¹Room utilization and occupancy metrics

¹Integration across platforms such as Zoom Device Management, Microsoft O365 Calendaring, Power BI

All your rooms, devices, and user accounts in one admin portal

*Requires Poly Lens Pro for Rooms license. A customer may use the Poly Lens Pro for Rooms trial for 90 days free of charge. ²Vyopta sold separately
