

Creating professional videos is easier than ever!

Use a rolling 3D film studio to produce explainer videos or presentations in-house without the need for previous technical knowledge. An out-of-the-box solution including all required hardware and software, Mastersolution Show lets you create TV-quality video content in no time – for your e-learning or self-service platform for instance.

We recommend a 1-day introductory/train-the-trainer workshop to get you started:

- Assembly and disassembly
- Hands-on video production with practical examples
- Tips and tricks on using effects, etc.

How it works:

STEP 1

Import your existing presentation (e.g. PowerPoint) and choose from a host of animated 3D blend effects.

STEP 2

Select your preferred studio template and apply a custom layout in your own corporate design.

STEP 3

Record the final product in real time without the hassle of post-production.

The preconfigured turnkey solution.

Everything you need is included:

- Notebook
- Green screen
- 2x LED lamps incl. tripods
- Mastersolution SHOW software
- Android tablet
- Bluetooth headset
- HD camera
- Flight case
