

Copilot Readiness Workshop.

Embark on a journey with us to bring Copilot for Microsoft 365, Copilot Chat, and agents to life within your company. Together, we analyze your existing environment, develop a roadmap and solution concept, and showcase the potential of Copilot for your AI-driven transformation.

The workshop provides you with a clear needs analysis, the development of a business case, and a hands-on proof of concept, enabling you to experience the business value of Copilot firsthand. This way, we establish a well-founded basis for decision-making and prepare your team optimally for the next steps towards an AI-driven operation.

What is the content of the Workshop?

In this workshop, we assess your current Microsoft 365 environment, develop a tailored roadmap, and create a solution concept for the implementation of Copilot. Together, we develop a business case that clearly outlines the benefits and demonstrate Copilot, Copilot Chat, and agents in a hands-on proof of concept.

What value do we provide?

• Strategic Orientation

You will receive a clear roadmap for the implementation and use of Copilot, Copilot Chat, and agents.

• Business Case as a Foundation

We will work with you to create a reliable decision-making basis that makes investments and benefits transparent.

• Hands-on Proof of Concept

Experience the functionalities of Copilot directly in your environment and gain concrete insights into its added value.

• Comprehensive Support

From analysis and roadmap to implementation, you will be guided by certified Microsoft specialists.

What is the benefit?

- Strategic Insights into AI Transformation with Copilot
- Clear recommendations for action on the next steps
- Business Case as a Decision-Making Basis
- Practical PoC as evidence of added value
- Support in Establishing Organizational and Technical Foundations
