

HPE & VMware Hybrid Cloud Solution.

DIGITAL TRANSFORMATION WITH A HYPERCONVERGED SYSTEM AND HIGH PERFORMANCE HYBRID CLOUD SOLUTION.

Modernize your data center now with a software-defined infrastructure. Digital transformation is firmly on the IT agenda, put there by CEOs as the No. 1 priority for CIOs, according to the Digital Business survey from IDG.

Given their performance, scale, and flexibility, HPE servers and VMware vSAN™ provide a simple path from server virtualization to hyperconverged infrastructure (HCI) toward a fully modernized IT environment and hybrid cloud solution.

YOUR BENEFIT OF A HCI SOLUTION.

1. LESS COMPLEXITY.

HCI is the most time- and cost-efficient way to a software-defined data center and the multi-cloud vision. Simplify infrastructure in order to reduce the time to provision new systems or to maintain existing ones.

2. CONTROL COSTS.

Optimize budget for physical and professional resources in order to meet growing organizational demand and SLAs for IT services. Accelerated time-to-value: Turnkey solutions like HCI help you maximize ROI from day one.

3. AUTOMATE DELIVERY AND CONSUMPTION OF IT SERVICES.

Use API-driven, open and flexible platforms to simplify management and orchestration experiences

4. PREPARE FOR HYBRID CLOUD.

Modernize the data center in an effort to protect current investments while embracing edge and public cloud use cases. Transform your IT operating model: Enhance productivity, allow management processes by policy, and operate with agility to accelerate innovation.

Your strong IT partner.
Today and tomorrow.

KEY RESULTS.

72%

lower operational costs, IT staff time and lost productivity.

452%

5-year ROI.

10 months

to payback.

THE POWER AND EXTENSIBILITY OF VMWARE CLOUD FOUNDATION.

With VCF, you can seamlessly take the next step from HCI to a fully modernized SDDC. The platform delivers a set of software-defined services for compute, storage, networking, security, and cloud management.

VCF deploys a standardized and validated architecture with built-in lifecycle automation for full-stack, modular infrastructure. VCF includes end-to-end security built into every layer of the infrastructure, from micro-segmentation at the networking layer down to encryption at the storage layer.

HPE Synergy with VCF provides the perfect platform for an enterprise-ready private cloud solution that is:

FLEXIBLE

a future-proof infrastructure

AGILE

simple to deploy, reducing complexity and cost

EFFICIENT

software-driven, employing more automation

80 % OF ORGANIZATIONS PLANNING TO MOVE TO HYBRID CLOUD WITHIN TWO YEARS.

Bechtle can help you in your seamless transition to this hybrid world and push your digital transformation efforts toward the finish line. Get in contact with us today.
