

Assess - Journey to Windows 11

In partnership with Bechtle

Are you Windows 11 ready?

ASSESS

DEPLOY

MANAGE

Generate a **free** Windows 11 Readiness report, with a 3-minute survey

This assessment tool helps you evaluate the device eligibility within your estate and provides recommendations to navigate Windows 10 EoS, and transition to Windows 11. Click on the link below to start your journey:

»» Get ready for Windows 11 with Bechtle

1. Survey - Provide details about your organisation, procurement considerations you make and how you deploy and manage your Windows devices.
2. Capture and upload data - Follow our instructions to capture data about your current devices and submit the details on the Upload Logs page.
3. Share Your Report - Your data and survey responses are analysed to generate a Windows 11 Readiness Report that you can share with your organisation's decision-makers.

The Windows 11 Readiness Survey Tool automatically converts your data into non-technical terminology highlighting:

- Devices already running Windows 11.
- Devices running Windows 10 which can be upgraded to Windows 11.
- Devices that require further investigation to confirm if they can run Windows 11.
- Devices that are not capable of running Windows 11, providing an estimated cost for purchasing new devices or Extended Security Updates (ESU)

What device is right for the business end-users?

Whether you're looking to procure compatible devices or explore options for modernising your existing estate, Bechtle offers the technical expertise to recommend a range of vendor-agnostic hardware solutions. Our approach considers your business needs, sustainability goals, budget, and preferred vendor alignment - ensuring the right fit for your environment.

From here, Bechtle are on-hand to simplify deployment options with you and help you identify answers to questions such as:

- How do I migrate from Windows 10?
- How can I deploy if I don't have the resource to take on a project like this?
- Are refurbished or remanufactured devices as replacements suitable for Windows 11?
- How do I reach remote users?

To explore ongoing support options with Bechtle, ask our team about **Deploy in partnership with Bechtle**.
