

# Job descriptions with focus

... Self-created - easy to implement, as a rental or purchase option

**Have you thought about video instructions for your workstations ... created by yourself, of course?**

**You want** ... professional documentation of work steps and technical presentation, on the road, at the workplace, in the trade, in the office ... for added value in your workflow!

### Hardware and software bundle:

FOCUS is a ready-to-use complete system comprising hardware and software. The headband and vest can be adjusted to the user's stature and height. An additional camera can be mounted on the supplied tripod and provides a larger overview in addition to the two user perspectives.

### Convenient transportation:

The comprehensive hardware consisting of cameras, remote control, power banks, LED lights and tripod is supplied in a practical and high-quality backpack trolley and is quickly ready for use in a wide variety of locations.

- **We support you** in the production of video-based instructions directly at the workplace.
- **The hardware enables complex activities to be recorded from up to three perspectives (headband, vest and tripod) in a single work process and displayed synchronously with the associated software.**
- Additional comments and notes can be added.
- The lighting is also integrated into the vest.

### Some examples of use:
